Question: 1

A consultant has been hired to architect a hybrid cloud solution for a client. The consultant decides to build two clouds: one for development and one for production. Which product can move workloads from the development cloud to the cloud?

- A. vFabric Suite
- B. vCloud Connector
- C. vCenter Server
- D. vRealize Operations

Answer: B

Question: 2

An organization is evaluating to a hybrid cloud infrastructure. They already manage an onsite vsphere environment and want to better understand the benefits of migrating data to vcloud air. What would be a compelling reason for the client to migrate to a hybrid cloud solution?

- A. They will be able to use storage clusters and Storage Distributed Resource Scheduling.
- B. They will be able to more easily optimize the provisioning and performance of their virtualized workloads.
- C. They will be able to place their mission-critical virtual machines under Fault Tolerance protection.
- D. vRealize Automation will allow them to leverage vSphere Distributed Switches.

Answer: C

Question: 3

An administrator for a regional service provider has a predominately mobile client base. Which statement represents an availability challenge that this administrator might face?

- A. The clients want to work on business problems instead of worrying about always being "hands on" with their virtual workloads.
- B. The clients need connectivity and flexibility without being required to host their own internal VPN services.
- C. The clients have workloads in your data center and want to migrate to hosting providers in different geographical areas.
- D. The clients need the ability to quickly deploy preconfigured workloads on demand.

Answer: D

Question: 4

An administrator is examining a data center to validate that it is operating as efficiently as possible.

Which option represents an Efficiency challenge the administrator might face?

- A. Needing to easily roll back changes to workloads during testing and development.
- B. Wanting to provide multi-tenant access to cloud resources without compromising security.
- C. Needing semi-isolated and autonomous environments for the application development teams.
- D. Wanting to align IT costs with corporate models by classifying IT as an operating expense.

Answer: C

Question: 5

A manager wants to know why traditional usage metering tools are less effective in a private cloud environment than they are in physical environments. What statement provides the best response?

- A. Traditional monitoring tools won't work in a cloud environment.
- B. Traditional metering tools require agents to be installed, which don't work in virtual machines.
- C. Resource usage is based on the overall demand of all virtual machines instead of per server.
- D. This is not true, traditional usage metering tools are still the best choice.

Answer: B

Question: 6

A company has decided to move to a hybrid cloud environment. They are concerned that this may increase management complexity by requiring multiple interfaces. Which product provides a single interface for all virtual machines within a hybrid cloud environment?

- A. vCenter Server
- B. vFabric Suite
- C. vCloud Connector
- D. VMware NSX

Answer: C
