Version: 4.0

Question: 1

You have just completed analyzing a set of images by using Oracle Cloud Infrastructure (OCI) Data Labelling, and you want to export the annotated data.

a. Which two formats are supported?

- A. CONLL V2003
- B. COCO
- C. Data Labelling Service Proprietary JSON
- D. Spacy

Answer: B, D

Question: 2

As a data scientist, you use the Oracle Cloud Infrastructure (OCI) Language service to train custom models. Which types of custom models can be trained?

- A. Image classification, Named Entity Recognition (NER)
- B. Text classification, Named Entity Recognition (NER)
- C. Sentiment Analysis, Named Entity Recognition (NER)
- D. Object detection, Text classification

Answer: B

Question: 3

What preparation steps are required to access an Oracle AI service SDK from a Data Science notebook session?

- A. Create and upload score.py and runtime.yaml.
- B. Create and upload the API signing key and config file.
- C. Import the REST API.
- D. Call the ADS command to enable AI integration

Answer: B

Question: 4

You are asked to prepare data for a custom-built model that requires transcribing Spanish video

recordings into a readable text format with profane words identified.
Which Oracle Cloud service would you use?

- A. OCI Translation
- B. OCI Language
- C. OCI Speech
- D. OCI Anomaly Detection

Answer: C

Question: 5

You are using Oracle Cloud Infrastructure (OCI) Anomaly Detection to train a model to detect anomalies in pump sensor data

a. How does the required False Alarm Probability setting affect an anomaly detection model?

- A. It is used to disable the reporting of false alarms.
- B. It changes the sensitivity of the model to detecting anomalies.
- C. It determines how many false alarms occur before an error message is generated.
- D. It adds a score to each signal indicating the probability that its a false alarm.

Answer: B
