Question: 4

Brian created a page with multiple regions. He now wants to include a list of links to selectively display each region.

The screenshot shows a web page titled "Demonstration - Projects" with the subtitle "Generated based on a Sample Dataset!". Below the title is a navigation bar with three tabs: "Page Navigation", "Chart", and "Calendar". The "Calendar" tab is selected and highlighted with a green border. Below the navigation bar is a section titled "Calendar". Inside this section is a calendar interface with a header row showing "Sun", "Mon", and "Tue". The dates 30, 1, and 2 are displayed below the headers. Below the dates are three columns of tasks, each with a blue background and white text. The tasks are: "Announce Rollout of revised IT Management apps to all IT staff" (under Sun), "Contact initial customers to educate them on providing quotes and success stories" (under Mon), and "Announce Customer Success app to all customers and staff" (under Tue).

Sun	Mon	Tue
30	1	2
Announce Rollout of revised IT Management apps to all IT staff	Contact initial customers to educate them on providing quotes and success stories	Announce Customer Success app to all customers and staff

How can Brian achieve this?

- A. Create a region of type Region Display Selector, and ensure that each region has Region Display Selector set to Yes."
- B. Create a parent region called REGIONS. For each region, update the Parent Region attribute to REGIONS.
- C. Create a list in Shared Components containing each region, Create a region of type List and associate the list created.
- D. Define static IDs for each region, Create a region called REGION of Type Static Content with named anchors to other regions.

Answer: A

Question: 5
