Version: 12.0

Question: 1

Which two parameters are required in a back end set's HTTP health check? (Choose two.)

A. response body
B. URL path
C. timeout
D. port
E. status code

Answer: AE

Reference:
https://docs.cloud.oracle.com/iaas/Content/Balance/Tasks/editinghealthcheck.htm

Question: 2

Which two are true for achieving High Availability on Oracle Cloud Infrastructure? (Choose two.)

A. Store your database across multiple regions so that half of the data resides in one region and the other half resides in another region.
B. Attach your block volume form Availability Domain 1 to a compute instance in Availability Domain 2 (and vice versa) so that they are highly available.
C. Configure your database to have Data Guard in another Availability Domain in Sync mode within a region.
D. Store your database files on Object Storage so that they are available in all Availability Domains in all
regions.
E. Distribute your application servers across all Availability Domains within a region.

Answer: BE

Question: 3

Which two configuration formats does Terraform support? (Choose two.)

A. YAML
B. JSON
C. HCL
D. XML

Answer: BC

Reference:
https://docs.cloud.oracle.com/iaas/Content/API/SDKDocs/terraformconfig.htm

Question: 4

At the end of a terraform apply operation, what is the default output?

A. nothing by default
B. statistics about what was added, changed, and destroyed
C. the entire state file
D. statistics about what was added, changed, and destroyed, and the values of outputs

Answer: D

Reference:
https://www.terraform.io/intro/getting-started/outputs

Question: 5

You have created a public subnet in a VCN, and your public subnet has a Route Table, a Security List, and an Internet Gateway. However, none of the compute instances can connect to the Internet. Which two are possible reasons for the connectivity issue? (Choose two.)

A. There is no Dynamic Routing Gateway (DRG) associated with the VCN.
B. The Route Table has no default route for routing traffic to the Internet Gateway.
C. There is no stateful ingress rule in the Security List associated with the public subnet.
D. There is no stateful egress rule in the Security List associated with the public subnet.

Answer: BC

Question: 6

You want an instance in your compartment to make API calls to other services within Oracle Cloud Infrastructure without storing credentials in a configuration file.
What do you need to do?

A. No action is required. By default, all VM instances are created with an Instance Principal.
B. Instances cannot access services outside their compartment.
C. VM instances are treated as users. Create a user and assign the user to that VM instance.
D. Create appropriate matching rules in the Dynamic Group to create an Instance Principal.

Answer: A

Question: 7

Which three must be configured for a load balancer to accept incoming traffic? (Choose two.)

A. a listener
B. a back-end server
C. a back end set
D. a security list that is open on a listener port
E. a certificate

Answer: ADE

Reference:
https://docs.cloud.oracle.com/iaas/Content/Balance/Tasks/managinglisteners.htm

Question: 8

Which two statements are true about Oracle Cloud Infrastructure Compute Service? (Choose two.)

A. You can launch a virtual or bare metal instance by using the same LaunchInstance API.
B. You cannot launch a bare metal server in Oracle Cloud Infrastructure Compute Service.
C. You can attach a block volume in an Availability Domain other than your compute instance.
D. You can share custom images across tenancies and regions.

Answer: AD

Reference:
https://docs.cloud.oracle.com/iaas/Content/Compute/Tasks/imageimportexport.htm

Question: 9

Which five are the required parameters to launch an instance in Oracle Cloud Infrastructure? (Choose five)

A. subnet
B. Availability Domain
C. Virtual Cloud Network
D. host name
E. instance shape
F. image operating system
G. private IP address

Answer: ABCEF

Reference:
https://docs.cloud.oracle.com/iaas/Content/Compute/Concepts/computeoverview.htm

Question: 10

Which DNS resource record type is used to point a host name to an IPv4 address?

A. ALIAS
B. A
C. CNAME
D. AAAA

Answer: B

Reference:
https://docs.cloud.oracle.com/iaas/Content/DNS/Reference/supporteddnsresource.htm

Question: 11

Which three can you achieve by using Terraform? (Choose three.)

A. Create resources in the right order without regard to the order in the terraform plan file.
B. Automatically re-provision the resources that are tainted or whose configuration has changed.
C. Automatically translate a deployed infrastructure and create a plan.
D. Automatically destroy all the resources that are in tenancy.
E. Continuously maintain the configuration files in an instance.

Answer: ABD

Question: 12

Your application front end consists of several Oracle Cloud Infrastructure compute instances behind a load balancer instance. You have configured the load balancer to perform health checks on these instances.
If an instance fails to pass health checks, what will happen?

A. The instance is replaced automatically by the load balancer.
B. The instance is terminated automatically by the load balancer.
C. The instance is taken out of the back end set by the load balancer.
D. The load balancer stops sending traffic to that instance.

Answer: D

Question: 13

Which statement is true about cloning a volume?

A. You need to detach a volume before cloning from it.
B. A cloned volume is the same as a snapshot that has a dependency on the source volume.
C. You cannot change the block volume size when cloning a volume.
D. You can create a clone for a volume across regions.

Answer: C

Reference:
https://docs.cloud.oracle.com/iaas/Content/Block/Tasks/cloningavolume.htm

Question: 14

Which scaling option does Database Cloud Service (DBCS) on Bare Metal Shape offer?

A. network bandwidth
B. CPU
C. storage
D. memory

Answer: C

Reference:
https://cloud.oracle.com/iaas/database/faq

Question: 15

Which statement is true about Oracle Cloud Identifiers (OCID)?

A. mytenancy.oc.ocid is a valid OCID.
B. If you delete a user, and them create a new user with the same name, the user will be considered a
different user because of different OCIDs.
C. Users can customize OCIDs for all the resources in their compartments.
D. If you delete a user, and then create a new user with the same name, the new user will be assigned the exact same OCIDs as the system remembers.

Answer: B

Reference:
https://docs.cloud.oracle.com/iaas/Content/Identity/Tasks/managingusers.htm (see note)
