Version: 7.0

Question: 1

How are classes sorted in a traffic tree?

- A. By service precedence
- B. By priority, rate and average utilization
- C. By parent, child, and sibling relationships
- D. By server port number

Answer: C

Explanation:

<https://origin-symwisedownload.symantec.com/resources/webguides/packetguide/11.5/Content/Topics/overviews/tree-overview-legacy.htm>

Question: 2

When would Symantec recommend backing up measurement data, using the measurement engine?

- A. Prior to a software upgrade
- B. Before returning the appliance to the manufacturer
- C. When verifying that a transfer is complete
- D. After performing a restore of the data from backups

Answer: D

Explanation:

https://origin-symwisedownload.symantec.com/resources/webguides/packetguide/current/reference/cli/measure_restore.htm

Question: 3

When would the traffic class Inbound/HTTP inherit its policy from another class?

- A. When Inbound/HTTP has an ignore policy applied
- B. When Inbound/HTTP has a rate policy applied
- C. When Inbound/HTTP has a priority policy applied
- D. When Inbound/HTTP does not have a policy applied

Answer: D

Question: 4

Which option best defines an "unreliable network" within PacketShaper?

- A. It has NO traffic trees defined in the PacketShaper
- B. Its latency is decreased, meaning that the frequency of time-outs and retransmissions spike
- C. It offers no guarantees that packets will NOT be delayed, damaged, or lost
- D. Its acknowledgments are in UDP, NOT TCP

Answer: A

Question: 5

Which PacketShaper report displays the percentage of bytes that are NOT retransmits?

- A. The TCP Health graph
- B. The Network Efficiency graph
- C. The Normalized Network Delay graph
- D. The Top 10 Classes graph

Answer: B

Explanation:

<https://origin-symwisedownload.symantec.com/resources/webguides/packetguide/11.10/Content/PDFs/AdaptiveResponse.pdf>

Question: 6

What statement accurately describes Folder classes and Default classes?

- A. Folder classes are used for exceptions, and Default classes are used to define how matches for traffic flows are found
- B. Folder classes are used for organization, and Default classes are used to catch unclassified traffic
- C. Folder classes and Default classes always share the same parent classes
- D. Folder classes are used to catch unclassified traffic, and Default classes are used for organization

Answer: A

Question: 7

Which option contains adaptive response agents?

- A. Network health, Unit health and Application health
- B. Component health, Application health and Active interfaces
- C. Unit health, CPU load balancing and Cluster health
- D. Component health, Active interfaces and Network health

Answer: A

Explanation:

<https://origin-symwisedownload.symantec.com/resources/webguides/packetguide/11.9/Content/Topics/overviews/adaptiveresponse-overview.htm>
