Answer: A

| Question: 1 | | |
|---|---|----------------------------------|
| Which two components are requi addition to the Tablet Prevent and | ired for the Symantec Data Loss Pre I Enforce servers? (Select two.) | evention for Tablets solution in |
| A. DLP Agent B. Virtual Private Network Gatewa C. Web Proxy D. 2010 Exchange Server | ау | |
| E. Mobile Device Management | | |
| | | Answer: B, C |
| Question: 2 | | |
| Which profile contains informatic Prevention for Tablets solution? | on to enable the VPN on Demand | functionality for the Data Loss |
| A. DLP Agent profile B. SCEP profile | | |
| C. iOS profile D. VPN client profile | | |
| | | Answer: C |
| Question: 3 | | |
| A scanner fails to return results up to eliminate previous scan issues? | pon completion of the scan process. | Which file should be removed |
| A. scanner_typeScanner.cfg | | |
| B. Clean.exeC. ScannerControllerLogging.prope | erties | |

Question: 4

D. logs

A Network Monitor server has been installed and the networking components configured accordingly. The server is receiving traffic, but fails to detect incidents. Running Wireshark indicates that the desired traffic is reaching the detection server. What is the most likely cause for this behavior?

Answer: B

| A. The mirrored port is sending corrupted packets.B. The wrong interface is selected in the configuration.C. The configuration is set to process GET requests.D. The communication to the database server is interrupted. | | |
|---|----------------------------|--|
| | Answer: D | |
| Question: 5 | | |
| An administrator has completed the example document training process, but is having difficulty deciding whether or not to accept a VML profile. Where can the administrator find information regarding the quality of each training set at a granular, per-fold level? | | |
| A. machinelearning_training_process.log file | | |
| B. machinelearning_native_filereader.log file C. machinelearning_training.log file | | |
| D. machinelearning_native_manager.log file | | |
| | Answer: C | |
| Question: 6 | | |
| An approved Endpoint device has been configured and added as an exception to a policy that blocks the transfer of sensitive data. Data transfers to these approved Endpoint devices are still being blocked. What should the Data Loss Prevention administrator do to resolve this? | | |
| A. disable and enable the policy involved for the changes to take effect | | |
| B. edit the exception rule to ensure Match On is set to "Attachments" | | |
| C. verify that the proper device ID or class has been entered D. assign the Endpoint device configuration to all the Endpoint servers | | |
| | Answer: C | |
| Question: 7 | | |
| Question. 7 | | |
| Which product can replace a confidential document residing on a share wit why the document was removed? | h a marker file explaining | |
| A. Network Discover B. Network Protect C. Endpoint Prevent D. Endpoint Discover | | |

| Question: 8 | |
|--|-----------------------------------|
| What is one benefit of using FlexResponse for Network Discover? | |
| A. Response rules trigger varying actions depending on which DLI B. An email can be encrypted as it is being transmitted. C. Displayed incident data can be redacted from the Data Loss Predocted incident remediation actions can be manually expended. | evention interface automatically. |
| | Answer: D |
| Question: 9 | |
| Which product must run on a physical server? | |
| A. Endpoint Prevent B. Network Monitor C. Enforce D. Network Prevent | |
| | Answer: B |
| Question: 10 | |
| A user attempts to run Lookup Attributes manually on an incide Incident Actions, the option for Lookup Attributes is missing. Wh file is misconfigured? | |
| A. Plugin Execution Chain is undefined.B. Attribute Lookup parameters is set to "message".C. Automatic plugin reload is set to false.D. Automatic Lookup is set to false. | |
| | Answer: A |
| Question: 11 | |
| What are two possible ways to provide incident match text inform | nation? (Select two.) |
| A. CSV export B. Email notification C. Reporting API D. Syslog notification E. XML export | |
| | Answer: C, E |

Answer: B

| Question: 12 | |
|---|--|
| Which two should be used to collect log informat | on from Enforce servers? (Select two.) |
| A. enable the VontuSNMP service and set the con B. use the Log Collection and Configuration tool C. navigate manually to the log directory of the Er Daccess the Enforce Log Viewer page at https://E. use dbgmonitor from sysinternals to connect to | nforce server installation <vontu_srv>/logs?view=true.</vontu_srv> |
| | Answer: B, C |
| Question: 13 | |
| | der System > Servers > Alerts it was last updated |
| | 4 / . \ |
| | Answer: D |
| | Answer: D |
| Question: 14 | Answer: D |
| Question: 14 What is a possible solution when a Network Disco | |
| | ver server is unable to scan a remote file server? 000 server er |
| What is a possible solution when a Network Disconnection. A. mount the IPC\$ share on the file server. B. verify that the target file server is a Windows 2. C. use the fully qualified name (FQDN) of the server. | ver server is unable to scan a remote file server? 000 server er |
| What is a possible solution when a Network Disconnection. A. mount the IPC\$ share on the file server. B. verify that the target file server is a Windows 2. C. use the fully qualified name (FQDN) of the server. | over server is unable to scan a remote file server? 000 server er ning |
| What is a possible solution when a Network Disconnection. A. mount the IPC\$ share on the file server. B. verify that the target file server is a Windows 2. C. use the fully qualified name (FQDN) of the server. | over server is unable to scan a remote file server? 000 server er ning |
| What is a possible solution when a Network Discontinuous A. mount the IPC\$ share on the file server B. verify that the target file server is a Windows 2 C. use the fully qualified name (FQDN) of the serv D. verify that the file server has .NET services run | over server is unable to scan a remote file server? 000 server er hing Answer: C |

| Question: | 16 | |
|------------------|----|--|

What is the function of the Remote Indexer?

- A. to create Index Document Matching (IDM) profiles and Exact Data Matching (EDM) profiles on a remote server
- B. to create Exact Data Matching (EDM) profiles on a remote server
- C. to create policy templates on a remote server
- D. to create Index Document Matching (IDM) profiles on a remote server

| | Answer: B |
|---|-----------|
| | |
| _ | |

What are two benefits of the Symantec Data Loss Prevention 11.5 security architecture? (Select two.)

- A. Communication is initiated by the detection servers inside the firewall.
- B. SSL communication is used for user access to the Enforce Platform.
- C. Endpoint Agent to Endpoint Server communication uses the Triple Data Encryption Standard (Triple DES).
- D. Confidential information captured by system components is stored using Advanced Encryption Standards (AES) symmetric keys.
- E. All indexed data uploaded into the Enforce Platform is protected with a two-way hash.

Answer: B, D
