Answer: B

Question: 2

Which menu on the Cisco TelePresence VCS should you refer to in order to verify that an endpoint has registered?

- A. Application
- B. Status
- C. Security
- D. Configuration

Answer: B

Question: 3

After you change the IP address of a Cisco TelePresence Codec C90, you are unable to use Telnet or a browser to connect to that address. However, you are able to use ping to connect to the new address. What are the two possible causes? (Choose two.)

- A. The configuration failed and there is another device with the same address that responds to the ping.
- B. The codec disabled the Telnet and HTTP services after the IP address change.
- C. The codec needs to reboot after the IP address change in order to bind the services to the new address.
- D. The gatekeeper configuration failed and you need to set up the gatekeeper address and the discovery type again.

Answer: A, C

Question: 4

The camera remote control is not responding. What can an engineer check in order to determine if the camera remote control or the system is causing the problem?

- A. The monitor is on the right channel.
- B. The switch inside the remote control is switched on.
- C. The light flashes on the camera when a key is pressed.
- D. The batteries are correctly placed within the remote.

Answer: C

Question: 5
