

Cisco

646-656

Wide Area Application Services for Account Managers

- A. server offload capability
- B. reduced security infrastructure requirements
- C. the use of NetFlow
- D. reduced storage requirements

Answer: B, D

Question: 63

How many routers and Cisco WAE appliances does WCCPv2 support?

- A. 16 routers and 32 WAE appliances
- B. 32 routers and 32 WAE appliances
- C. 8 routers and 16 WAE appliances
- D. 32 routers and 8 WAE appliances

Answer: B

Question: 64

Data Redundancy Elimination (DRE) allows the WAE to maintain what?

- A. a local database of TCP segments that have already been seen by the device
- B. a local database of TCP segments that use MZ compression
- C. avoidance algorithms that safely maximize throughput in lossy scenarios
- D. TCP connections that exit the slow-start phase and progress more quickly to receiving ample throughput

Answer: A

Question: 65

Which hardware platform does Cisco WAAS software run on?

- A. ACE module
- B. DRE appliance
- C. WAE
- D. CSM module

Answer: C

Question: 66

Which Cisco WAAS requirement results in a greater support for optimizations?

- A. deployment of WCCP
- B. deployment in two or more sites
- C. deployment of multiple ACE linecards
- D. transparent optimizations

Answer: B

Question: 67

What is the best way to mitigate latency?

- A. use NetFlow to isolate chatty protocols and filter them
- B. deploy a QoS solution
- C. deploy a less chatty application
- D. deploy an intelligent protocol proxy

Answer: D

Question: 68

Which Cisco solution enables data center scalability and greater manageability?

- A. central management of all protocol services
- B. DRE
- C. ACE virtualization
- D. protocol acceleration

Answer: C

Question: 69

How do you keep administrative traffic from traversing the WAN?

- A. by deploying centrally-managed services
- B. by deploying a firewall with managed services
- C. by using an intrusion prevention system with centrally-managed services
- D. by using an IVS

Answer: A

Question: 70

Cisco Wide Area Application Services (WAAS) Software is a comprehensive WAN optimization solution that accelerates applications over the WAN, delivers video to branch offices, and provides local hosting of branch-office IT services. What is the difference between the Cisco WAAS product family and its competitors?

- A. Competitors can provide stateful firewall protection support for.
- B. Cisco WAAS slows down the VoIP.
- C. The Cisco WAAS router module reduces the branch footprint.
- D. The Cisco WAAS design uses only a few tunnels.

Answer: C

Question: 71

Lots of customers can not get a quick response from their enterprise web-based applications. Which of the following items do you think is the best solution?

- A. Consolidate servers into the data center and apply a Cisco WAE to seamless access over the WAN.
- B. Deploy AVS at the data center and WAEs at remote sites to optimize response time.
- C. Place files on a central server and enable access over the WAN.
- D. Distribute and cache files on WAEs--this eliminates the need for local distribution servers.

Answer: B

Question: 72

Which three types of services are ones that WAAS deployment can offer to remote users? (Choose three.)

- A. security
- B. file
- C. print

D. call-control

Answer: B, C, D
