unt_Server/R210-BUN-4/p/1623294

QUESTION: 35
A customer has data center needs for memory-intensive applications, including modeling applications. Which Cisco UCS C-Series server best fits this requirement?

A. Cisco UCS C250 M1
B. Cisco UCS C200 M1
C. Cisco UCS C210 M1
D. Cisco UCS C260 Ml

Answer: A

Explanation:
http://www.cisco.com/en/US/products/ps10502/index.html

QUESTION: 36
Which server offers up to up to 384 GB of industry-standard DDR3 main memory in48 DIMMs?

A. Cisco UCS C250 M1

B. Cisco UCS C210 M1
C. Cisco UCS C200 M1
D. Cisco UCS C260 M1

Answer: A

Explanation:
http://www.cisco.com/en/US/products/ps10502/index.html

QUESTION: 37
How does the CIMC protect the network from intrusions for the Cisco UCS C-Series servers?

A. It interacts with Cisco UCS Manager to provide centralized security
B. It has an internal firewall that can be configured according to network policies
C. It provides power to the server even in the event of a processor failure.
D. It uses IP blocking.

Answer: D

Explanation:

QUESTION: 38
Which two situations have impacted virtualization server technology (Choose Two)

A. Easy-to-secure policy coherence
B. Increased number of virtualized servers to manage
C. Need for increased points of management
D. Need to consolidate the server infrastructure to a single location
E. Reduced number of physical servers needed

Answer: B, E

QUESTION: 40
Which server is best suited for storage-intensive applications such as network file servers and appliances, storage servers, database content-delivery servers?

A. Cisco UCS C250 M1
B. Cisco UCS C200 M1
C. Cisco UCS C210 M1
D. Cisco UCS C260 M1

Answer: C

Explanation:
