**QUESTION: 76**

You manage the software asset lifecycle for a customer. The customer's security policy states that employees can only install and use approved software. You need to implement a process to support the security policy. Which process should you implement?

- A. change management
- B. Client Access Licenses (CALs) approval
- C. intrusion detection
- D. license recovery

**Answer: A**

**QUESTION: 77**

Your customer purchases Microsoft Office Project 2003 under a volume license agreement. The customer does not have Microsoft Software Assurance. The customer installs 200 copies of Project 2007. You need to ensure that the customer is in compliance with software licensing. The solution must minimize costs. What should you do?

- A. Purchase Microsoft Software Assurance.
- B. Purchase 200 full packaged product (FPP) licenses for Microsoft Office Project 2007.
- C. Purchase 200 full packaged product (FPP) licenses for Microsoft Office Standard 2007.
- D. Purchase 200 Microsoft Office Project 2007 licenses through the customer's volume licensing agreement.

**Answer: D**

**QUESTION: 78**

Your software inventory report identifies several installations of unapproved software on employee computers. You need to implement a process that prevents employees from installing software. What should you include in the process?

- A. Install a network monitoring tool.
- B. Update the software and hardware inventory.
- C. Request that an IT administrator modify the Group Policy objects (GPOs).
- D. Generate a license advisor report and contact the Business Software Alliance (BSA).

**Answer: C**

**QUESTION: 79**

Your customer uses Microsoft Office Excel to maintain an inventory of software and hardware assets. You need to recommend a tool that generates daily reports on changes to the inventory of applications installed on computers. Which tool should you recommend?

- A. a network monitoring tool
- B. a procurement tool
- C. the SAM ROI Calculator
- D. a software asset inventory tool

**Answer: D**

**QUESTION: 80**

Your customer completes an internal audit. The audit concludes that the customer does not maintain hardware and software inventories. You need to implement a process that enables the customer to maintain hardware and software inventories. Which step should you include in the process?

- A. Gather install, move, add, change (IMAC) activities.
- B. Collect cost savings information related to reusing software.
- C. Purchase all software and hardware from an online auction site.
- D. Collect hardware purchase history and generate a Microsoft Product License Advisor (MPLA) report.

**Answer: A**

**QUESTION: 81**

Your customer has an Active Directory forest that contains a Microsoft System Center Configuration Manager (CfgMgr) server. Users have portable computers that are frequently disconnected from the network. The customer does not have a change management system in place. The current hardware inventory is out-of-date.

You need to update the hardware inventory to meet the following requirements:

- Ensure that all desktop and portable computers are included in the inventory.
- Minimize the amount of time it takes to update the inventory. What should you do?

- A. Perform a network discovery scan.
- B. Perform a manual count of all desktop computers.
- C. Gather install, move, add, change (IMAC) activities.
- D. Gather information from the Active Directory database, the CfgMgr database, and the purchasing history.

**Answer:** A

**QUESTION:** 82

Your customer's network consists of one Active Directory forest. The network contains a Microsoft System Center Configuration Manager (CfgMgr) server and a Microsoft System Center Operations Manager (OpsMgr) server. All computers are joined to the Active Directory domain and have both CfgMgr and OpsMgr clients installed. You plan to manage the software and hardware retirement process for the customer. You need to identify all retired desktop computers. What should you do?

- A. Generate a CfgMgr report.
- B. Generate an OpsMgr report.
- C. Review the Active Directory Group Policy objects (GPOs).
- D. Review the Active Directory domain controller event viewer logs.

**Answer:** A

**QUESTION:** 83

You manage the software and hardware retirement process for a customer. The customer does not have Microsoft Software Assurance. The customer plans to retire desktop computers that have the following characteristics:

- All hardware is more than three years old.
  - All desktop computers have Windows preinstalled.
  - All Microsoft Office licenses are purchased under a volume license agreement. You need to recommend a solution for reusing licenses.
- What should you recommend?

- A. Reuse none of the licenses.
- B. Reuse all licenses for Office.
- C. Reuse all licenses for Windows.
- D. Purchase Software Assurance and reuse all licenses.

**Answer:** B

**QUESTION:** 84

You manage all software licenses for a company named Contoso, Ltd. Contoso licenses all Windows desktop computers under an OEM licensing agreement and all Microsoft Office Professional licenses under a volume licensing agreement. Following an acquisition, Contoso plans to transfer all licenses to an unaffiliated company named Litware, Inc. You need to transfer all licenses from Contoso to Litware.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Complete a transfer request form for all Office licenses.
- B. Complete a transfer request form for all Windows licenses.
- C. Transfer all desktop computers from Contoso to Litware.
- D. Transfer all Certificate of Authenticity (COA) stickers from Contoso computers and to Litware computers.

**Answer:** A, C

**QUESTION:** 85

Your customer has an office in New York. The customer plans to donate 400 desktop computers to a local nonprofit organization. All computers have Windows preinstalled. You need to ensure that the customer can donate the computers and remain in compliance with all applicable licensing agreements. The solution must provide as many hardware and software resources as possible for the nonprofit organization. What should you do?

- A. Remove the operating system and Certificate of Authenticity (COA) from each computer. Transfer the computers to the nonprofit organization.
- B. Reinstall Windows by using the original media. Transfer the computers, media, Certificates of Authenticity (COAs), and manuals to the nonprofit organization.
- C. Purchase a Windows license for each computer under a volume licensing agreement. Transfer the computer and the license to the nonprofit organization.
- D. Remove the hard disks from all computers. Transfer the computers to the nonprofit organization and recommend that they purchase a new Windows license for each computer under a full packaged product (FPP) licensing agreement.

**Answer:** B
