QUESTION 36
Your network contains a server named Server1 that runs Windows Server 2008 R2. You need to ensure that an administrator is notified by e-mail if the Event Viewer logs any error.
What should you do from the Event Viewer console?

A. Create a custom view, and then click the Filter Current Custom View action.
B. Create a custom view, and then click the Attach Task to This Custom View action.
C. From the System log, click the Filter Current Log action.
D. From the System log, select an Error event, and then click the Attach Task to This Event action.

Correct Answer: B

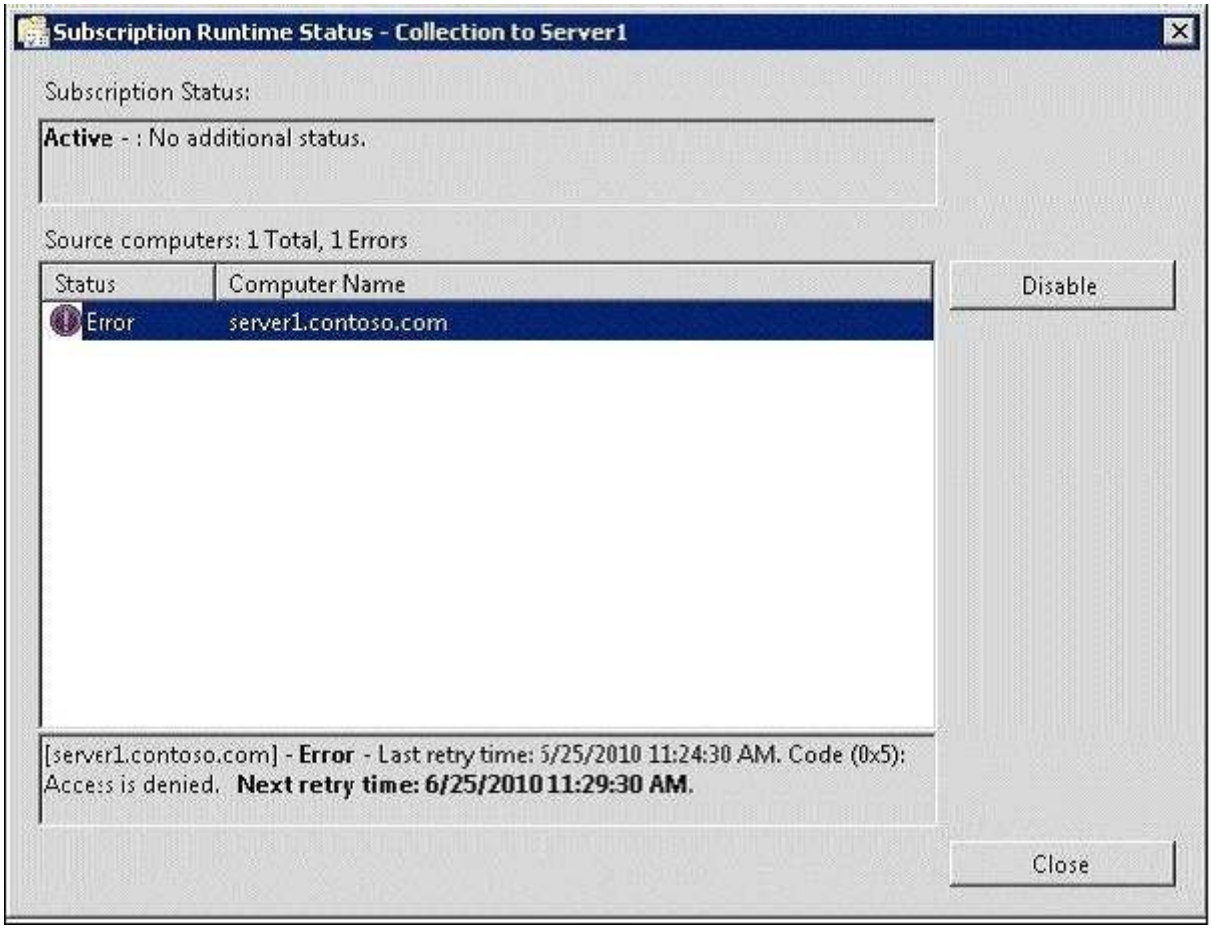
QUESTION 37
Your network contains two servers named Server1 and Server2 that run Windows Server 2008 R2. From Server1, you create a collector-initiated subscription that uses Server2 as a source computer. You verify the event subscription and discover the error message shown in the exhibit. (Click the Exhibit button.)



You need to ensure that the subscription collection runs successfully.
What should you do?

A. On Server1, run winrm quickconfig.
B. On Server2, run winrm quickconfig.
C. From the properties of the subscription, modify the User Account options.
D. From the properties of the subscription, modify the Protocol and Port options.

Correct Answer: C

QUESTION 38
Your network contains a DNS server named DNS1 that runs Windows Server 2008 R2. You need to be notified by e-mail if the DNS service logs errors or warnings. The solution must minimize the number of e-mail notifications you receive.
What should you do?

A. Create an alert in Performance Monitor.
B. Run the Configure a DNS Server Wizard.
C. Select the DNS Server log from Event Viewer and attach a task to the log.
D. Create a custom view from Event Viewer and attach a task to the custom view.

Correct Answer: D

Reference:

QUESTION 39
Your network contains a server named Server1 that runs Windows Server 2008 R2.
You have a user named User1.
You need to ensure that User1 can view the events in the Security event log. The solution must minimize the number of rights assigned to User1.
What should you do?

A. In Event Viewer, filter the Security log.
B. In Event Viewer, configure the properties of the Security log.
C. In the Local Security Policy console, modify the Security Options.
D. In the Registry Editor, add a Security Descriptor Definition Language (SDDL) value.

Correct Answer: D

Reference:

QUESTION 40
Your network contains 200 servers that run Windows Server 2008 R2. You need to archive the Security log for each server on a daily basis.
Which tool should you use?

A. Netsh
B. Secedit
C. Wecutil
D. Wevtutil

Correct Answer: D
