Premiere/Encore/OnLocation(R) CS3 ACE

QUESTION: 122
You are having difficulty selecting buttons in the Menu Viewer in an Encore project. What should you do?

A. Select the button in the Library panel.
B. Select the button's layer in the Layers panel.
C. Select the button in the Styles panel.
D. Choose Object > Arrange > Bring to Front and then select the button.

QUESTION: 123
You have an AIF audio file and an MP3 audio file in the Project panel in an Encore project. You also have a menu displayed in the Menu Viewer. What happens when you drag both the audio files to the menu in the Menu Viewer?

A. None of the audio tracks are added to the menu.
B. The audio track listed first in the project panel is added to the menu.
C. The audio track listed second in the project panel is added to the menu.
D. Both the audio files are added to the menu.

QUESTION: 124
In an Encore project, after creating a subpicture using the Object > Create Subpicture command, you want to customize the menu color set. However, the Highlight menu in the Properties panel is disabled. What could be the probable reason for this?

A. The menu is using the automatic color set.
B. A customized color set CANNOT be created after creating a subpicture.
C. The layers were NOT labelled correctly.
D. The subpicture does NOT have a color set.

QUESTION: 125

In an Encore project, which column in the Layers panel enables you to convert a layer set in the Layers panel into a button?

A. Button/Object
B. Display/Hide
C. Lock/Unlock
D. Transcode Settings

Answer: A

QUESTION: 126
You want to apply a random Pan and Zoom effect to all the slides in a slide show. What must you ensure before applying the effect to the complete slide show?

A. Any one slide in the slide show must be selected.
B. None of the slides of the slide show must be selected.
C. Pan and Zoom effect should NOT already be applied to a slide in the slide show.
D. All the slides should have the same transition effect.

Answer: B

QUESTION: 127
You enable the Subtitle option for all the slides of a slide show in Encore. What should you do to apply a specific color to the subtitle?

A. Choose Timeline > Edit Timeline Color Set to edit Group 1 colors.
B. Select Match Slideshow in the Properties panel.
C. Apply a text style from the Styles panel.
D. Change the text properties of the slide show in the Characters panel.

Answer: A

QUESTION: 128
In Encore, you create a slide show containing 10 slides. The complete duration of the slide show is 40 seconds. You add two audio files to the slide show. The length of each audio file is 25 seconds. You select Fit Slideshow To Audio Duration in the Audio pane of the Properties panel. What happens? (Choose two.)

A. The duration of the slide show increases to 50 seconds.

B. The duration of all slides becomes equal.
C. The duration of each slide increases proportionally.
D. The audio plays only for the duration of the complete slide show.
E. The audio plays even after the slide show is complete.

Answer: A, B

QUESTION: 129
Where in the Properties panel can you customize the direction of the Wipe transition of a selected slide?

A. The Basic pane
B. The Effects pane
C. The Transition pane
D. The Additional Options pane

Answer: C
