Answer: B

QUESTION: 96

You are creating artwork that will be exported and displayed on a Web page. You have used a wide variety of colors in the artwork, but you want to limit the colors in the exported file to a set of specific colors. Which two file formats allow you to do this in the Save for Web & Devices dialog box? (Choose two.)

- A. GIF
- B. SVG
- C. SWF
- D. JPEG
- E. PNG-8
- F. WBPM
- G. PNG-24

Answer: AE

QUESTION: 97

You are creating some artwork that will be displayed on a mobile "smart" phone. What should you do to preview how the artwork will appear?

- A. choose View > Pixel Preview
- B. choose View > Proof Setup > Customize
- C. choose File > Save for Web & Devices, then click the Device Central button
- D. choose File > Save for Web & Devices, then choose SWF from the Optimized File Format pop-up menu

Answer: C

QUESTION: 98

On a 468x60 pixel artboard you create a 468x60 pixel banner advertisement to be exported as a PNG file and displayed on a web site. However, in the Save for Web & Devices dialog box you

notice that a drop shadow effect extends past the edge of the artboard, increasing the pixel dimensions of the file. What do you do to ensure the final image is the correct size?

- A. export the PNG using File > Export instead of Save for Web & Devices
- B. choose Object > Flatten Transparency before opening the Save for Web & Devices dialog box
- C. choose the Image Size tab in the Save for Web & Devices dialog box and select the Clip to Artboard checkbox
- D. choose the Image Size tab in the Save for Web & Devices dialog box and select the Constrain Proportions checkbox

Answer: C

QUESTION: 99

You are asked by an Adobe Flash developer to prepare artwork that will be used to create an interactive Flash form. In Illustrator, how should you tag a text object that will be used to collect data?
