**Question: 1**

---

Which two statements about Spark and MX components are true? (Choose two.)

- A. For each MX component, there is a corresponding Spark component
- B. For many MX components, there is a corresponding Spark component
- C. Spark components implement functionality and appearance in separate classes
- D. Spark components are extended to customize layout, just like MX components
- E. Spark and MX components CANNOT be used within the same application

---

**Answer: B, C**

---

---

**Question: 2**

---

Which statement about Spark components is true?

- A. SkinnableComponent is a superclass of all Spark components
- B. UIComponent is NOT a superclass of Spark components
- C. Spark components CANNOT be used in the same application with MX components
- D. NOT all Spark components are skinnable

---

**Answer: D**

---

---

**Question: 3**

---

Which approach allows you to specify a layout for a Spark container?

- A. Each Spark container class defines a specific layout, so you must choose the Spark container corresponding to the layout you desire
- B. You must specify a CSS layout style corresponding to the id of the Spark container
- C. You must specify a value of "absolute", "horizontal" or "vertical" within the layout attribute of the Spark container
- D. You must specify one of the Spark layout classes within the layout attribute of the Spark container

---

**Answer: D**

---

---

**Question: 4**

---

Which statement comparing Spark and MX layouts are true?

- A. Spark layouts use layout classes, while MX layouts do not
- B. Spark and MX share the same layout attribute values
- C. Spark layouts do NOT support absolute positioning, unlike MX layouts
- D. Spark components do NOT have default layouts, so a layout must be specified

---

**Answer: A**

---

---

**Question: 5**

---

You want to create a sub class of `LayoutBase`. Which method must be overridden to specify positioning?

- A. `layout()`
- B. `measure()`
- C. `commitProperties()`
- D. `updateDisplayList()`

---

**Answer: D**

---

---

**Question: 6**

---

You want to create a custom layout to display a number of images in a carousel. Which superclass should you extend to create your custom layout?

- A. `HorizontalLayout`
- B. `VerticalLayout`
- C. `LayoutBase`
- D. `TileLayout`

---

**Answer: C**

---

---

**Question: 7**

---

Given the following code

```
<s:TextInput id="myTextInput" />
```

Which will allow you to set the content that will be displayed in the control?

- A. `myTextInput.label`
- B. `TextInput.label`
- C. `myTextInput.text`
- D. `TextInput.text`

---

**Answer: C**

---

---
