## Version: 8.0

---

### Question: 1

---

You want to access Content Consumption (Page Views/Visits) per Pages, Site Sections and Site Sub Sections. You have a separate custom traffic variable reserved for each of the reports. What is the best way to ensure that the Content Consumption calculated metric is available for all three reports?

- A. You only need to build it once and it will become available for all three reports
- B. Build that calculated metric three times, once in each report.
- C. That metric is only available for Pages so you will be unable to apply it to Site Sections or Sub Sections
- D. Choose the "copy" feature in the calculated metric builder to propagate the metric from one report to the other

---

**Answer: A**

---

---
