---

**Question: 1**

---

You need to implement the management app. The solution must meet the technical requirements.

What should you use?

- A. a PowerShell session to litwareinc.com
- B. a browser session to litwareinc.com
- C. a PowerShell remoting session to the PEP
- D. a browser session to the administrator portal

---

**Answer: D**

---

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-manage-portals?view=azs-2008>

---

**Question: 2**

---

HOTSPOT

You need to identify the certificate for the integrated system in Chicago. The solution must meet the

<https://www.certkillers.net>

technical requirements.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Certificate issuer: 

	▼
Enterprise CA	
Public CA	
Self-signed	

Certificate subject name: 

	▼
adminmanagement.northcentralus.litwareinc.com	
adminportal.northcentralus.litwareinc.com	
management.northcentralus.litwareinc.com	

---

**Answer:**

---

Explanation:

Certificate issuer: 

	▼
Enterprise CA	
Public CA	
Self-signed	

Certificate subject name: 

	▼
adminmanagement.northcentralus.litwareinc.com	
adminportal.northcentralus.litwareinc.com	
management.northcentralus.litwareinc.com	

When deploying Azure Stack Hub in disconnected mode it is recommended to use certificates issued by an enterprise certificate authority. This is important because clients accessing Azure Stack Hub endpoints must be able to contact the certificate revocation list (CRL).
