IBM Tivoli Netcool/Impact V6.1 Implementation

QUESTION: 110
The DSA XML data type mapping information is stored in which XML configuration file?

A. $IMPACT_HOME/dsa/bin
B. $IMPACT_HOME/dsa/XmlDsa
C. $IMPACT_HOME/dsa/Xmlinstall
D. $IMPACT_HOME/dsa/Xmlconfig

Answer: B

QUESTION: 111
An IBM Tivoli Netcool/lmpact system must process a maximum of 30 ObjectServer events per second. What can be used to verify that this requirement is being met?

A. enable Self-Monitoring and examine the resulting ObjectServer events for events/sec values
B. examine events/sec messages by using the View Service Log feature of the PolicyLogger service
C. examine events/sec messages by using the View Service Log feature of the EventProcessor service
D. examine events/sec messages by using the View ServiceLog feature of the OMNIbus EventReader service

Answer: C

QUESTION: 112
When using IBM Tivoli Netcool/lmpact V6.1 to insert a synthetic (or meta) event into Netcool/OMNlbus, which function can be used?

A. SendEvent
B. EventlnsertC. InsertEvent
D. ReturnEvent

Answer: D

QUESTION: 113

Which administration scripts allow the IBM Tivoli Netcool/lmpact Server to start and stop independently of the Embedded WebSphere Application Server?

A. eWAS start and eWAS stop
B. nci_server and nci_shutdown
C. impact_start and impact_stop
D. server start and server shutdown

Answer: B

QUESTION: 114
What is the output of the nci_export command?

A. a tar file
B. anxmlfile
C. a directory
D. a comma delimited file

Answer: C

QUESTION: 115
Which two options are required to execute the ncijrigger tool? (Choose two.)

A. server_name
B. policy_name
C. project_name
D. encrypted user_id
E. encrypted password

Answer: A, B

QUESTION: 116
What is the procedure to create a new data source?

A. SystemConfiguration > New Data Source
B. System Configuration > New Data Model > New Data Source
C. System Configuration > Event Automation > Settings > New Data Source

D. System Configuration > Event Automation > Data Model > Data Model tab > New Data Source

Answer: D

QUESTION: 117
Which three instant messaging programs are supported by the IBM Tivoli Netcool/lmpact Jabber Service? (Choose three.)

A. IRC
B. AIM
C. XML
D. MSN
E. XMPP
F. Yahoo

Answer: B, D, F

QUESTION: 118
Which command should beexecuted to collect log files for debugging issues?

A. $NCHOME/bin/nci_collect_log
B. $NCHOME/bin/nci_collect_logs
C. $NCHOME/impact/bin/ nci_collect_log
D. $NCHOME/impact/bin/nci_collect_logs

Answer: D

QUESTION: 119
Which two options are supportedusing IBM Tivoli Netcool/lmpact Data Source Adapters? (Choose two.)

A. JMS
B. data modeling
C. XinY processing
D. instant messaging
E. Web services security

Answer: A, E

QUESTION: 120
How many data sources are used to create a policy that enrichesIBM Tivoli Netcool/OMNIbus events from a remote Oracle database?

A. one data source for the remote Oracle data source
B. two data sources: one for the ObjectServer and one for the remote Oracle database C three data sources for the alerts.status table, alerts journal table and the alerts.details table
C. four data sources for OMNIbus, the alerts.status table and the remote Oracle database plus the table from where the data is gathered

Answer: B

QUESTION: 121
The volume of events that the operators have to resolve must be reduced. All the events from six service centers funnel through one central ObjectServer. The ObjectServer does not have access to the service location information, however the information is stored locally in an IBM DB2 database. The operators should only see critical events from specific service center locations. Which two key IBM Tivoli Netcool/lmpact V6.1 functional categories apply?

A. Scheduling
B. Web Services
C. Event Notification
D. Event Enrichment
E. Event Suppression

Answer: D, E

QUESTION: 122
How is an IBM Tivoli Netcool/lmpact Server Instance created?

A. using the nci_server script
B. using the nci_new_server utility
C. using the nci_configuration_utilitytool
D. using the WebSphere Administrative Console

Answer: C
