Version: 4.0

Question: 1

What is a scenario?

- A. A specific dialog that can occur between the system and a particular actor
- B. A description of the path the user takes through the use case and the data that is exchanged
- C. A set of possible dialogs that can occur between the system and one or more actors
- D. An ordered set of flows from the start of the use case to one of its end points

Answer: D

Question: 2

What characterizes a generic alternative flow of events?

- A. Is part of all scenarios
- B. Is part of several different use cases
- C. Applies at any point in a use case
- D. Handles several different error conditions

Answer: C

Question: 3

Why is using configuration management to maintain requirements beneficial? (Select all that apply.)

- A. Allows a managed baseline release strategy
- B. Preserves requirement document revisions
- C. Prevents circular traceability links
- D. Guards against changes to a requirement that could impact other requirements

Answer: A,B

Question: 4

Which of the following are properties of a use case? (Select all that apply.)

- A. Supplementary specifications
- B. Name
- C. Preconditions

- D. Flow of events
- E. Special requirements
- F. Design constraints

Answer: B,C,D,E

Question: 5

What question helps identify the actors in software requirements?

- A. What subsystems will be in the system?
- B. Who will be using the system?
- C. Who will be paying for the system?
- D. Who will be designing the system?

Answer: B

Question: 6

Which of the following are properties of a use case? (Select all that apply.)

- A. Supplementary specifications
- B. Name
- C. Preconditions
- D. Design constraints
- E. Flow of events
- F. Special requirements

Answer: B,C,E,F

Question: 7

Refer to the exhibit below. What are the three types of relationships in this use case?

- A. X includes, Y generalization, Z extends
- B. X generalization, Y includes, Z extends
- C. X extends, Y generalization, Z includes
- D. X extends, Y includes, Z generalization

Answer: A

Question: 8

What are the advantages of the use-case approach over traditional development approaches?

- A. Use cases represent the user's perspective

- B. Use cases give context to requirements
- C. Use cases visualize constraints
- D. Use cases identify all stakeholders

Answer: A,B

Question: 9

In which of the following cases could an "extend" relationship be implemented?

- A. One use case contains behavior optional to a second use case
- B. One use case contains behavior and purpose common to many other use cases
- C. One use case contains behavior common to a second use case
- D. Two use cases contain similar behavior

Answer: A

Question: 10

What describes a particular path through the flow of events described in a use case?

- A. Activity
- B. Sequence
- C. Communicates-association
- D. Scenario

Answer: D
