QUESTION 99

The network operation center has two groups of users that use the native desktop. One group, OPERATIONS, requires access to the standard event management tools like acknowledge and delete. They also require access to some custom tools for things like basic troubleshooting (ping and telnet) and ticket creation. The second group, NETWORK, requires access to the same tools used by the OPERATIONS group users In addition, there are a few tools used for advanced router diagnostics that they use. These tools are not to be available to the OPERATIONS group users. To minimize administration efforts a common desktop menu is used for both groups of users.

The users in the OPERATIONS group use Windows desktops to run the native desktop application. What is the technique used to ensure that they only run tools supported on Windows?

- A. no additional configuration is required
- B. the OPERATIONS group is configured to limit access to only those tools supported on Windows
- C. all of the tools used by the OPERATIONS group are configured to limit access to only Windows systems
- D. all of the menus used by the OPERATIONS group are configured to limit access to only Windows systems
