QUESTION: 153

Charles is working with a user who has just experienced a crash on his IBM Sametime Mobile application on an iOS device. How can Charles obtain the logs from the device?

- A. In the Sametime Mobile application, navigate to Info and click Send Logs.
- B. In the Apple Settings, navigate to Sametime - Troubleshooting and click Send Logs.
- C. The logs are automatically uploaded to the Sametime Proxy Server and can be retrieved from the Sametime System Console.
- D. Charles needs to log into the Sametime System Console and navigate to Sametime Servers - Sametime Proxy Server. After selecting the Sametime Proxy cluster, click on the "Retrieve Client Logs" button and specify the user's distinguished name. Select the device to collect the logs from and click OK. Charles will receive a link to a download the file.

Answer: B

QUESTION: 154

If an executive complains that the video resolution is too small, where in the Sametime System Console would an administrator resolve this issue?

- A. Policy configuration page
- B. Video MCU configuration page
- C. Video Manager configuration page

D. Conference Manager configuration page

Answer: C

QUESTION: 155

Renovations Inc. has two IBM Sametime Community Servers configured in a clustered environment. Why are the users being re-directed to the primary Sametime Community Server only?

- A. The secondary node is running with a lower fixpack level than the primary node.
- B. The Sametime administrator has stopped the secondary node to apply a recommended fixpack.
- C. The LTPA key on the secondary node that is being shared between the Sametime Community servers is corrupt.
- D. The Sametime administrator has given users the load balancer IP address instead of the secondary node IP address.

Answer: C

QUESTION: 156

How is LDAP tracing for IBM Sametime enabled?

- A. Use the LDAP search utility.
- B. Turn tracing on in the LDAP record in the stconfig.nsf.
- C. Add vp_ldap_trace=1 in the [Debug] section of the sametime .ini.
- D. Enter the command tell ldapshowconfig debug in the IBM Domino console window.

Answer: C
