Version: 8.0

Question: 1

Which technology does IBM recommend to secure remote support connections for the IBM DS8880 family?

- A. Modem
- B. Business-to-business VPN
- C. SSH over IP
- D. SSL

Answer: D

Explanation:

To achieve your security objectives on the DS8880 storage system, follow the recommended practices and actions.

Question: 2

Which statement is true about the XIV model 314 and the DS8886?

- A. Neither the DS8886 nor the XIV rack can be expanded.
- B. Both the XIV and the DS8886 can be ordered for a customer supplied rack.
- C. The DS8886 rack can be expanded, but the XIV rack cannot be expanded.
- D. Both the DS8886 rack and the XIV rack can be expanded.

Answer: C

Explanation:

The IBM 2831 DS8880 family includes two high-performance models: DS8884 Model 980 with its associated DS8884 Expansion Unit Model 98B, and DS8886 Model 981 with its associated DS8886 Expansion Unit Model 98E. The rack ships as a 40U configuration that can be expanded to 46U at installation

The XIV model 314 Base unit model: Physical capacity, disk drives, processor memory, and host adapter values represent the maximum configuration (on a model basis) and do not include the resources associated with any attached expansion units,

Question: 3

Which IBM storage solution has a competitive advantage over the Fujitsu ETERNUS DX8900 S3 for a customer that has three sites and requires replication with consistency?

- A. IBM DS8886 with Metro/Global Mirror function
- B. IBM DS8886 with SVC and stretch cluster
- C. IBM DS8886 with z/OS Global Mirror and GDPS
- D. IBM DS8886 with Global Copy and IBM Copy Services Manager

Answer: A

Explanation:

Metro/Global Mirror (a combination of Metro Mirror and Global Mirror) is a three-site remote copy solution. It uses synchronous replication to mirror data between a local site and an intermediate site, and asynchronous replication to mirror data from an intermediate site to a remote site.

Question: 4

What is a characteristic of IBM AIX HyperSwap?

- A. Requires a DS8000 FlashCopy relationship
- B. Needs Metro Mirror between both DS8000 storage systems
- C. Needs Global Mirror with four paths between DS8000s
- D. Requires DS8000 16 Gb Fibre Channel adapters

Answer: B

Explanation:

HyperSwap is a feature originally introduced in GDPS few years back and is for Metro Mirror PPRC (synchronous) environment, where it enhances the resilience of Parallel Sysplex by facilitating the immediate switching of PPRC-mirrored disk subsystems.

Note: Hardware requirements for PowerHA SystemMirror HyperSwap include:

Question: 5

What is an advantage of IBM DS8880 over the Hitachi G1000?

- A. Virtualization of external block storage devices
- B. FICON support
- C. Four site replication support

D. XRC (z/OS Global Mirror) support

Answer: C

Explanation:

The IBM DS8000 storage products support various types of copy services which can be easily used to design two, three and four site replication solutions.
