IBM Tivoli Storage Manager V7.1.1 Administration

Storage Manager? (Select two.)

A. Image backup
B. Lan free data movement
C. Data Encryption
D. Multisession (resourceutilization)
E. Incremental with the policy mode=absolute

Answer: A, B

QUESTION: 117
Which statement is true regarding node replication?

A. one source server can replicate to multiple target servers
B. one or more source servers can replicate to multiple target servers
C. one source server and one target sever are a closed pair
D. one or more source servers can share the same target server

Answer: A

QUESTION: 118
What does the BACKUP NODE command do when issued from the IBM Tivoli Storage
Manager Administrative command line (dsmadmc)?

A. creates an incremental copy of the node's data in the copy storage pool designated in
the command
B. invokes a dissimilar policy replication for a given node
C. starts node replication on a node
D. starts a backup operation for a network-attached storage (NAS) node

Answer: C

QUESTION: 119
Which component is vital to an IBM Tivoli Storage Manager Database operations in
addition to memory, database containers and archive log?

A. Archive Log Mirror
B. Recovery Failover Log
C. Recovery Log

D. Active Log

Answer: D

QUESTION: 120
What are two ways to increase the amount of IBM Tivoli Storage Manager server database disk space? (Select two.)

A. DSMSERV INSERTDBSPACE
B. DSMSERV EXTEND DBSPACE
C. EXTEND DBSPACE
D. DSMSERV FORMAT DBSPACE -EXTEND
E. INSERT DBSPACE

Answer: B, C

QUESTION: 121
A lower refresh interval updates the Operations Center information more frequently, but increases the requirement for which type of space?

A. storage pool
B. active log
C. database
D. error log

Answer: A

QUESTION: 122
Which type of tape volume can be used to satisfy any request for mounting an available tape volume?

A. private volume
B. scratch volume
C. barcoded volume
D. empty volume

Answer: B

Reference:

QUESTION: 123
What happens to existing deduplicated data when deduplication is turned off for that storage pool?

A. It is automatically rehydrated.
B. It must be manually rehydrated.
C. It must be migrated to another deduplicated storage pool.
D. It is retained as deduplicated.

Answer: D

QUESTION: 125
Which three storage pools are configured by default in the IBM Tivoli Storage Manager V7.1.1 server? (Select three.)

A. BACKUPPOOL
B. ARCHIVEPOOL
C. COPYPOOL

D. STGPOOL
E. TAPEPOOL
F. SPACEMGPOOL

Answer: A, B, D

QUESTION: 126
Which object must be defined for node replication?

A. deduplication plan
B. rules
C. server group
D. server group communication

Answer: B

QUESTION: 127
Which option can be used to include Active Directory entries for a domain controller in an IBM Tivoli Storage Manager backup?

A. domain vss
B. domain activedirectory
C. domain ad
D. domain systemstate

Answer: A
