Question: 1

When is an IBM WebSphere Portal database transfer required?

A. when security is enabled
B. when the database must be hidden
C. before the trial period for the default database expires
D. when IBM WebSphere Portal server is used extensively

Answer: C

Question: 2

ON IBM WebSphere Application Server, what must be configured before IBM Web Experience Factory can connect to a database?

A. JDBC resource
B. JMC message route
C. database syndicator
D. Web experience factory database connection

Answer: A

Question: 3

Paul wants to create pages that will be formatted automatically with the same the page layout, portlets and portlet configuration.
Which of these should he use?

A. page template
B. formatting widget
C. copy and paste functions
D. Workspace formatting button

Answer: A

Question: 4

Jonathan plans to integrate external XML data using IBM digital data connector (DDC).
Which of these must he use to map the external XML data structure to the data attributes used by IBM Web Content Manager Design components?

A. a bean list
B. an XML DDC plug-in
C. a list rendering profile
D. a list rendering context

Answer: C

A list-rendering profile defines the set of attributes available in the beans that are contained in bean lists that a DDC plug-in generates. Furthermore, the generic XML DDC plug-in supports listrendering profiles to define the mapping between the XML data structure and the actual attribute values. You define this mapping by associating the attribute definitions in the profile with individual XPath expressions.

Question: 5

Which view displays selected builder inputs and their current settings for a generated element that is selected in the Application Tree or in the Design Panel?

A. Debugger view
B. Problems view
C. Properties view
D. Applied Profiles view

Answer: C
