Version: 9.0

Question: 1

Which statement is true regarding the Navigator Views tab in Administer Users?

- A. Available views are navigator views in which the user has view access.
- B. Assigned views are navigator views in which the user has view access.
- C. Assigned root are navigator items in which the user has change access.
- D. Assigned views are navigator views in which the user has change access.

Answer: C

Question: 2

What does the IBM Tivoli Monitoring administrator have to answer questions about when configuring an OS agent?

- A. whether to auto start the agent
- B. the connection to the data warehouse
- C. the connection to the Tivoli Enterprise Portal Server
- D. the connection to the Tivoli Enterprise Monitoring Server

Answer: C

Question: 3

Where should the IBM Tivoli Monitoring Event Synchronization component be installed when installing the components for event forwarding?

- A. on its own host
- B. on the same host as the Tivoli Enterprise Portal Server
- C. on the host of the hub Tivoli Enterprise Monitoring Server
- D. on the same host as the IBM Tivoli Netcool/OMNIBusObjectServer

Answer: C

Explanation:

Question: 8

How can an administrator create a simple way for a user to go to the same workspace on a different server?

- A. Create a relative link that allows the user to choose a different server when they select the link.
- B. Create a dynamic link that allows the user to choose a different server when they select the link.
- C. Create an absolute link that allows the user to choose a different server when they select the link.
- D. Create a temporary link that allows the user to choose a different server when they select the link.

Answer: A

Question: 9

A Tivoli Enterprise Portal (TEP) user wants to go straight from the Linux process workspace to CPU utilization. How can this task be simplified?

- A. Click the CPU utilization workspace.
- B. Create a relative link to the CPU utilization workspace.
- C. Create an absolute link to the CPU utilization workspace.
- D. Define a reference pointer in the TEP that points to the CPU utilization workspace.

Answer: A

Question: 11

What is the most likely problem given this navigator tree?

- A. The Tivoli Enterprise Portal Server (TEPS) database is corrupt.
- B. The hub Tivoli Enterprise Monitoring Server's internal database is corrupt.
- C. The TEPS does not have the application support installed for the Windows operating system monitoring agent.
- D. The Windows operating system monitoring agents are not connecting with the IBM Tivoli Monitoring infrastructure.

Answer: C

Question: 12

When configuring tracing, which option will set the number of files kept to 20 in the rolling cycle of one startup?

- A. COUNT=20
- B. MAXFILES=20
- C. MAXFILES=20LIMIT=20
- D. MAXFILES=20COUNT=20

Answer: A

Explanation:
