Question: 4

For what is the S1G (Sub-1 GHz) PHY (Physical Layer) most likely to be used?

A. Tablets
B. IoT (Internet of Things)
C. Laptops
D. Desktops

Answer: B

Question: 5

Why must a cloud-managed AP have access to the Internet for initial setup?

A. Because the users connecting to the AP will demand Internet access
B. Because the AP uses the Internet to calibrate its antennas
C. Because the AP uses the Internet to access the cloud service
D. Because the AP uses the Internet to set its password

Answer: C

Question: 6

Using Dynamic Rate Switching (DRS), when a client must change to a lower data rate, what best defines the action?

A. The client lowers the data rate by 1 Mbps each time
B. The client lowers the data rate to the lowest data rate supported each time
C. A client lowers the data rate by 5% each time
D. The client lowers the data rate to the next lowest fixed rate that should work properly based on link quality

Answer: D

Question: 7

Where is an omnidirectional antenna typically placed for best results?

A. Above the target coverage area
B. The edge of the target coverage area
C. Beneath the target coverage area
D. The center of the target coverage area
