---

**Answer: A**

---

---

**Question: 3**

---

Which type of join supports a temporal condition in a calculation view?

- A. Referential join
- B. Inner join
- C. Text join
- D. Left outer join

---

**Answer: B**

---

---

**Question: 4**

---

Referring to the diagram,

which privileges would a user require to view United States data when querying the CUBE calculation view?

- A. A SELECT privilege on the CUBE calculation view and an Analytic Privilege (Country = United States) on the DIMENSION calculation view
- B. A SELECT privilege and an Analytic Privilege (Country = United States) on the DIMENSION calculation view
- C. A SELECT privilege and an Analytic Privilege (Country = United States) on the CUBE calculation view
- D. SELECT privileges and Analytic Privileges (Country = United States) on both views

---

**Answer: A**

---

---

**Question: 5**

---

What options do you have to handle orphan nodes in your hierarchy? Note: There are 2 correct answers to this question.

- A. Define an expression to determine a parent.
- B. Generate additional root nodes.
- C. Assign them to a level below the root.
- D. Assign them to a node at the root level.

---

**Answer: B C**

---
