SAP Certified Application Associate - SAP S/4HANA Cloud (public) - Supply Chain Implementation

QUESTION & ANSWERS

Question: 1

A purchase contract can be created with reference to which of the following data objects: Choose 2

 A. Purchase requisition

 B. Contract template

 C. Purchase order

 D. Purchase contract

Answer: A,B

Explanation/Reference:

Explanation:- You can either create a purchase contract with reference to a purchase requisition or with reference to a contract template.. Detailed Explanation Provided in this E-Book Chapter:- S4C10e Implementing SAP S/4HANA Cloud - Sourcing and Procurement, Unit: Purchase Contract, Lesson: Outlining Purchase Contracts.

Question: 2

After completing an SAP S/4HANA Cloud certification, what must you do to maintain "current" knowledge and certification status? Choose 2

 A. Attend Live Sessions related to your certification area in the SAP S/4HANA Cloud Implementation Learning Room when new delta content is released

 B. Complete the Stay Current assessment that corresponds to your certification in the SAP S/4HANA Cloud Implementation Learning Room when new delta content is released

 C. Complete the Stay Current assessment that corresponds to your certification through the SAP Certification Hub when new delta content is released

 D. Review the Stay Current content that corresponds to your certification in the SAP S/4HANA Cloud Implementation Learning Room when new delta content is released

Answer: B,D

Explanation/Reference:

Explanation:- You must review the Stay Current content and complete the Stay Current assessment that corresponds to your certification when new delta content is released in the SAP S/4HANA Cloud Implementation Learning Room to maintain your certification status. While it's always a great idea to attend live sessions in the Learning Room, you do not have to do this to maintain your certification. Also, only the certification exam is completed via the SAP Certification Hub; the Stay Current content and assessments are hosted in SAP Learning Hub. We always provide links to the latest Stay Current content and assessments in the SAP S/4HANA Cloud Implementation Learning Room on the "Stay Current" page. . Detailed Explanation Provided in this E-Book Chapter:- S4C01e RISE with SAP S/4HANA Cloud Onboarding Fundamentals,

Unit: Deploy and Run, Lesson: Maintaining Continuous Innovation.

Question: 3

All Customer Personalization done using Self-service Configuration (SSC) UIs and Expert Configuration is stored separately from SAP Best Practice content.

A. TRUE

B. FALSE

Answer: A

Explanation/Reference:

Explanation:- Personalizations are all stored separately to protect the system against unwanted changes.. Detailed Explanation Provided in this E-Book Chapter:- S4C10e Implementing SAP S/4HANA Cloud - Sourcing and Procurement, Unit: SAP S/4HANA Cloud Sourcing and Procurement Overview, Lesson: Analyzing SAP S/4HANA Cloud .

Question: 4

An employee, John, who is a member of multiple teams and handles different functions across those team is retiring. What app would you use to find and replace John with a new team member to take over the same functions?

A. Business Event Handling

B. Maintain Business Users

C. Responsibility Management

D. SAP Business Workflows

Answer: C

Explanation/Reference:

Explanation:- You would use the Responsibility Management app to find and replace a member and their associated functions with another member across teams. If required, you can assign only one of the functions of a selected member to another member across teams. This removes the function from the selected member. You have to choose the category and type to see the list of functions available to reassign. . Detailed Explanation Provided in this E-Book Chapter:- S4C01e RISE with SAP S/4HANA Cloud Onboarding Fundamentals, Unit: Explore, Lesson: Working with the SAP Fiori Launchpad and Apps.
