Version: 6.2

Question: 1	
You are designing a two-tiered Dell EMC SC Series solution that will be of You gather the necessary data from Live Optics and find that the read/writ	•
What approach is recommended?	
A. Size Tier 1 for 100% of the adjusted IOPS B. Use distributed adjusted IOPS for all tiers C. Use distributed adjusted IOPS for Tiers 1 and 2 only D. Size Tier 2 for 100% of the adjusted IOPS	
	Answer: A
Explanation:	
"The engineer should design a system to handle all, or nearly all, IOPS in o	ne particular tier"
Question: 2	
You are sizing a new Dell EMC SC Series array. Upon analyzing the Live current system has a peak throughput of 4687 MB.	Optics report, you find the
What is the minimum number of 10Gb iSCSI front-end ports required to m	eet the throughput needs?
A. 8 B. 10 C. 12 D. 16	
_	Answer: D
Explanation:	

Question: 3	
What is the Dell EMC best practice for sizing and designing a Dell E	EMC SC Series solution?
 A. Front-end ports required for performance should always meet of B. Drive capacity should meet performance needs C. Size for performance first and capacity second D. Size for capacity; Data Progression should always meet perform 	
	Answer: C
Explanation:	
Question: 4	
You plan to schedule a Live Optics sampling with your customer However, the customer wants to postpone the run until the end be more	· ·
activity on the current storage system. What course of action is red	commended?
A. Wait until the end of the quarter and collect a week-long sampl B. Take a single-day sampling on any given day because that is suff C. Wait until the end of the quarter and collect a single-day sampli D. Take a week-long sampling on any given week because that is so	icient in most instances ing
	Answer: B
Explanation:	
Question: 5	
A customer site has four NAS servers participating in MetroSync feature could reduce failover times?	replication. Which Dell EMC Unity
A. QoS Failover Policy B. Cabinet Failover C. SRDF Metro D. Consistency Groups	
	Answer: B
