Version: 8.0

Question: 1

An IT architecture is characterized as monolithic and rigidly bound.
What difficulty with adopting DevOps practices can be expected?

A. Clearly defining the boundaries of the IT systems
B. Defining areas of responsibility for each DevOps team
C. Maintaining the increasingly complex architecture

Answer: B

Question: 2

DevOps benefits from a 'start-up spirit' to focus on innovation and entrepreneurship.
Which attitude to change fits with that start-up spirit in DevOps?

A. Authoritarian
B. Autonomous
C. Conservatism
D. Experiments

Answer: C

Question: 3

Commercial off-the-shelf software (COTS) has both advantages and limitations for businesses.
What is true about COTS?

A. COTS supports continuous development with its fast implementation
B. COTS will save the business time and money, by reducing development time
C. Depending on the type of COTS used, the possibility of customization is limited

Answer: B

Question: 4

DevOps implies that not only the boundary between Development and Operations must disappear.
Which other boundary must also disappear?

A. The boundary between Development and marketing
B. The boundary between IT management and the rest of the IT department
C. The boundary between the finance department and Development
D. The boundary between the HR department and Operations
E. The boundary between the IT department and the business

Answer: A

Question: 5

In DevOps, the organization should start where they are and progress iteratively.
What needs to change compared to a more traditional environment to facilitate progression?

A. Cultural and organizational changes within the IT department only
B. Disappearance of the Development and Operations departments
C. Implementation of complex systems, to ensure confidence in the systems
D. Management principles and approaches to information technology

Answer: D
