Version: 10.0

Question: 1

Which data center characteristic ensures that adequate resources are provided to efficiently store and process data?

A. Capacity
B. Availability
C. Scalability
D. Performance

Answer: A

Question: 2

Which data center management process involves collating and presenting the utilization of resources?

A. Reporting
B. Provisioning
C. Planning
D. Maintenance

Answer: A

Question: 3

Which type of digital data has no defined format but has a self-describing structure that enables its analysis?

A. Semi-structured data
B. Structured data
C. Metadata
D. Quasi-structured data

Answer: A

Question: 4

Which type of digital data consists of textual data with inconsistent formats but can be formatted with the use of software tools?

A. Quasi-structured data

B. Semi-structured data
C. Metadata
D. Unstructured data

Answer: A

Question: 5

What is an accurate statement about a hybrid cloud?

A. Supports data and application portability for load balancing between clouds
B. Allows organizations with common concerns to share the cost of deploying the cloud
C. Enables the entire cloud infrastructure to be controlled by the consumer's IT staff
D. Allows an organization to outsource the implementation of a private cloud to a cloud provider

Answer: A

Question: 6

What is an accurate statement about Software as a Service?

A. Consumer has limited control over user-specific application configuration settings
B. Consumer has control over the operating systems and deployed applications
C. Consumer has control over the configuration settings of the application-hosting environment
D. Consumer has limited control over select networking components, such as host firewalls

Answer: A

Question: 7

Which cloud service does VMware vCloud Air provide?

A. Infrastructure as a Service
B. Platform as a Service
C. Database as a Service
D. Software as a Service

Answer: A

Question: 8

A start-up company with a limited budget is planning to adopt a hybrid cloud solution for their operations. The company has business-critical applications that serve customers and have strict service levels. In addition, the company has less critical applications such as backup and archive. Which hybrid cloud strategy should be recommended to the company?

A. Deploy the business-critical applications on an externally-hosted private cloud. Deploy the less critical applications on a public cloud.
B. Deploy the business-critical applications on an on-premise private cloud. Deploy the less critical applications on an externally-hosted private cloud.
C. Deploy the business-critical applications on an on-premise private cloud. Deploythe less critical applications on a public cloud.
D. Deploy the business-critical applications on an externally-hosted private cloud. Deploy the less critical applications on an on-premise private cloud.

Answer: A

Question: 9

Which benefit does the measured service characteristic provide to a cloud service provider?

A. Enables control and optimization of resource use
B. Enables cloud services to communicate with each other
C. Enables availability of specific resources depending on policy
D. Enables the reduction and/or elimination of upfront IT expenditure

Answer: A

Question: 10

Which cloud computing characteristic enables multi-tenancy and abstracts the location of provided resources?

A. Resource pooling
B. Measured service
C. Rapid elasticity
D. Broad network access

Answer: A

Question: 11

What is an accurate statement about Infrastructure as a Service?

A. Consumer has control over the operating systems and the deployed applications
B. Consumer only has control over user-specific application configuration settings
C. Consumer has control over network devices, compute systems, and storage systems
D. Consumer only has control over the configuration settings of the application-hosting environment

Answer: A

Question: 12

What is an accurate statement about Platform as a Service?

A. Consumer has control over the deployed applications
B. Consumer has control over the operating system and database management system
C. Consumer has control over the programming languages and tools
D. Consumer has control over the operating system and storage

Answer: A

Question: 13

Which capability does big data analytics provide?

A. Enabling data-driven decisions from large volumes of data
B. Storing large volumes of data without affecting availability
C. Reducing the data storage capacity requirement
D. Performing analytics using traditional tools

Answer: A

Question: 14

What is signified by the "variability" characteristic of big data?

A. Meaning of the data changes constantly
B. Data is generated in different formats by numerous sources
C. Data change rate affects its timely analysis
D. Varying data quality affects its reliability and accuracy

Answer: A

Question: 15

What is signified by the "variety" characteristic of big data?

A. Data is generated in different formats by numerous sources
B. Meaning of the data changes constantly
C. Varying data quality affects its reliability and accuracy
D. Data change rate affects its timely analysis

Answer: A

Question: 16

What does the transformation of an operating model for third platform adoption involve?

A. Provisioning IT resources through a self-service portal
B. Establishing new roles and responsibilities to manage IT services
C. Adopting virtualization technologies to enable automation
D. Building new technical and business skills in the IT staff

Answer: A

Question: 17

What is an accurate statement about a data lake?

A. Stores data as an exact or near-exact copy of the source format
B. Supports query and analysis by classifying and organizing data before storing
C. Stores current and historical data in a structured format on object-based storage
D. Provides a single consistent view of data across an organization for report generation

Answer: A

Question: 18

Which capability is provided by a software-defined storage controller?

A. Ability to pool and abstract physical storage and present it as an open storage platform
B. Ability for multiple operating systems to run concurrently on a single physical compute system
C. Mechanisms to automatically create application programming interfaces for centralized management
D. Single self-contained package with integrated hardware and software components

Answer: A

Question: 19

What is a benefit of using converged infrastructure for building a data center?

A. Reduces the time to acquire and deploy the infrastructure
B. Provides the flexibility to purchase individual IT components
C. Integrates existing IT components into the infrastructure
D. Offers the flexibility to change vendors and prevent vendor lock-in

Answer: A

Question: 20

What is a function of the orchestration layer in a data center infrastructure?

A. Provides workflows for automated execution of management tasks
B. Aggregates physical infrastructure components into resource pools
C. Measures the consumption of IT resources by various services
D. Decouples an operating environment from the underlying hardware

Answer: A
