---

**Question: 1**

---

For which IT solution is an Isilon NL-Series node best suited?

- A. Internet Web 2.0 applications
- B. Nearline archiving
- C. Quantitative analysis
- D. Hadoop workflows

---

**Answer: C**

---

---

**Question: 2**

---

Traditional NAS storage architectures deploy simple two-way failover between two controllers in storage systems, such as highly available configurations. How is the Isilon architecture different in terms of system resiliency and availability?

- A. OneFS enables each node to have a designated partner node for simple failover between the pair.
- B. Use of client-side drivers can enable failover to other nodes.
- C. Isilon clustered architecture deploys standby failover nodes to ensure the highest available solution.
- D. OneFS enables each node to be a peer to any other node in an Isilon cluster. Any node can take over for any other node.

---

**Answer: A**

---

---

**Question: 3**

---

An organization wants to monitor disk performance on their Isilon cluster. Which software module will provide this functionality?

- A. InsightIQ
- B. SmartQuotas
- C. SmartConnect
- D. SmartPools

---

**Answer: C**

---

---

**Question: 4**

---

Which command is used to renumber the nodes of an Isilon cluster?

- A. innset
- B. ipset
- C. deliprange / iprange

D. interface

---

**Answer: D**

---

---

**Question: 5**

---

In an Isilon environment, what is the total protection level offered by N+2:1?

- A. Two drives or one node can fail without any data loss in the cluster
- B. Two hot spare drives and one cold spare drive are available for disk failures
- C. Two hot nodes and one cold node are available for node failures
- D. Two drives on one node can fail without causing any data loss in the cluster

---

**Answer: B**

---

---

**Question: 6**

---

An administrator wants to configure antivirus scanning on an Isilon cluster. What is the best way to accomplish this task?

- A. Isilon web administration interface => Data Protection => Antivirus, and then click "Add an ICAP Server"
- B. Install the antivirus client on all nodes in the cluster
- C. Install the antivirus client on the logical node number in the cluster
- D. Isilon web administration interface => Data Protection, and then click "Install Antivirus Client"

---

**Answer: B**

---

---

**Question: 7**

---

An Isilon administrator needs to create a new Isilon cluster to support high performance and large capacity storage for a streaming media environment. Which node model is recommended?

- A. HD-Series
- B. NL-Series
- C. S-Series
- D. X-Series

---

**Answer: D**

---

---

**Question: 8**

---

In an Isilon environment, which type of storage node is best suited for high throughput and high concurrency using SATA drives?

- A. A100-Series

- B. NL-Series
- C. S-Series
- D. X-Series

---

**Answer: D**

---

---

**Question: 9**

---

When using an X410 node containing HDDs and SSDs, which bay numbers are used to contain SSDs in the standard configurations?

- A. Bays 1 and 2 only
- B. Bays 1 through 6
- C. Bays 31 through 36
- D. Bays 35 and 36 only

---

**Answer: B**

---
