

Huawei

H19-374_V1.0

HCS-Pre-sales-IVS V1.0

QUESTION & ANSWERS

Question: 1

SafeVideo+ features, the functions are

- A. Camera recordings installed at important points can be redundant as needed
- B. The recording of important time periods can be redundant on demand
- C. When part of the physical hard disk is damaged and the Raid group fails, the Raid group video is still readable
- D. When part of the physical hard disk is damaged and the Raid group fails, the Raid group can still write video

Answer: A,B,C,D

Question: 2

Which descriptions of Huawei video surveillance platform VCN3000 are correct on the equipment parameters?

- A. Support mixed insertion of SATA and SAS hard disks, hot-swappable hard disks and online replacement of failed hard disks; SAS channel interface performance 6Gbps:
- B. Image storage adopts block storage to avoid disk fragmentation:
- C. Supports LUN non-failure technology. When multiple hard disks are damaged, the recording data on the undamaged hard disks in the Raid group can still be read by the system.
- D. A single device can simultaneously access video streams: 256 channels, forwarding: 512Mbps, storage: 512Mbps, video playback and download: 128Mbps.

Answer: A,B,C,D

Question: 3

Which of the following protocols or specifications does Huawei video surveillance platform VCN3000 support?

- A. ONVIF
- B. SIP
- C. clairvoyance
- D. GB-T28181

Answer: A,B,C,D

Question: 4

What is the triple cloudization of Huawei's VCN3000 platform?

- A. Cloud between different devices
- B. Cloud between different RAID groups inside the device
- C. Cloud between different hard drives in the same RAID group
- D. Cloud between different clients

Answer: A,B,C

Question: 5

The main selling point of Huawei's video cloud solution is

- A. Architecture: Application and data decoupling, software and hardware decoupling
- B. Data: data sharing, platform intensive, business 'flowers blooming'
- C. Business: rapid business launch, agile integration, plug-in deployment
- D. Trend: The mode of policing has changed from passive to active, and from during and after the event to before the event

Answer: A,B,C

Question: 6

Which of the following features does the lightweight cloud solution include?

- A. Container
- B. Resource sharing
- C. Business collaboration
- D. Direct storage of video and picture streams

Answer: A,B,C

Question: 7

Some cases of Huawei Video Cloud: 80+ customers have been served by the Ministry of Public Security, provincial departments, prefectures and cities. Which ones can be visited ()

- A. Longgang, Shenzhen
- B. Qingdao
- C. Guangzhou
- D. Xiamen

Answer: A,B,C,D

Question: 8

A video cloud in Guangdong realizes cross-domain deployment and precise strikes. Its core values are reflected in three views, namely ()

- A. Comprehensive view: application-defined IPC, comprehensive and detailed
- B. All sharing: the province's linkage, one point initiation, the whole network responds
- C. Fully automatic: high computing power, multiple algorithms, second-level retrieval of hundreds of billions of images
- D. Full intelligence: end-to-end artificial intelligence, replacing human eyes with machine vision

Answer: A,B,C

Question: 9

The octopus-like distributed intelligent architecture, the core is to achieve four levels of collaboration, namely ()

- A. Resource collaboration
- B. Data collaboration
- C. Algorithm collaboration
- D. Task collaboration
