Question: 5

What is an advantage of the Junos Telemetry Interface(JTI) over SNMP?

- A. JTI can pull data more frequently
- B. JTI always transfers data over HTTP
- C. JTI never transfers data over UDP
- D. JTI can push data more frequently

Answer: D

Explanation:

The Junos Telemetry Interface (JTI) overcomes these limits by relying on a so-called **push** model to deliver data asynchronously, which eliminates polling. A request to send data is sent once by a management station to stream periodic updates. As a result, JTI is highly scalable and can support the monitoring of thousands of objects in a network.
