Quesi	כ.ווטו,	

Which statement is true about Layer 2 zones when implementing transparent mode security?

- A. All interfaces in the zone must be configured with the protocol family mpls.
- B. All interfaces in the zone must be configured with the protocol family inet.
- C. All interfaces in the zone must be configured with the protocol family bridge.
- D. All interfaces in the zone must be configured with the protocol family inet6.

Answer: D

Question:6

What are two AppSecure modules? (Choose two.)

- A. AppDoS
- B. AppFlow
- C. AppTrack
- D. AppNAT

Answer: B, D

Question:7

You are working as a security administrator and must configure a solution to protect against distributed botnet attacks on your company's central SRX cluster. How would you accomplish this goal?

- A. Configure AppTrack to inspect and drop traffic from the malicious hosts.
- B. Configure AppQoS to block the malicious hosts.
- C. Configure AppDoS to rate limit connections from the malicious hosts.
- D. Configure AppID with a custom application to block traffic from the malicious hosts.

Answer: C

Question:8

You are asked to change the configuration of your company's SRX device so that you can block nested traffic from certain Web sites, but the main pages of these Web sites must remain available to users. Which two methods will accomplish this goal? (Choose two.)

- A. Enable the HTTP ALG.
- B. Implement a firewall filter for Web traffic.
- C. Use an IDP policy to inspect the Web traffic.
- D. Configure an application firewall rule set.

E. application signature

Answer: B, D, E

	Answer: C, D
Question:9	
You are using the AppDoS feature to control against malicious bot clie using file downloads to attack your server farm. You have configured hits in 60 seconds. At which threshold will the bot clients no longer be of	a context value rate of 10,000
A. 5000 hits in 60 seconds B. 8000 hits in 60 seconds C. 7500 hits in 60 seconds D. 9999 hits in 60 seconds	
	Answer: B
Question:10	
Your company's network has seen an increase in Facebook-related to restrict the amount of Facebook-related traffic to less than 100 Mbps are three components used to accomplish this task? (Choose three.)	
A. IDP policy B. application traffic control C. application firewall D. security policy
