Administering IBM Lotus Sametime 8

QUESTION: 76
Gerco, a Sametime user, has the server extst.company.com listed as the home server in his Sametime Connect client. His person document in the LDAP directory states his home Sametime server is presence.company.com. When Gerco connects to extst.company.com, which of the following will occur next?

A. Gerco is denied access from logging into extst.company.com and the connection dropped.
B. Gerco logs successfully into extst.company.com and his buddylist is copied over presence.company.com.
C. Gerco first connects to extst.company.com but is redirected to the server listed in his LDAP entry to log in.
D. Gerco's LDAP entry is modified to list his new home Sametime server as extst.company.com and he continues to log in successfully.

Answer: C

QUESTION: 77
Mitchell, the Sametime administrator, has issued a Name Change for Melissa Smith. The utility provides an automatic backup to what name of which of the following databases?

A. stconfig.nsf.old
B. stcenter.nsf<timeStamp>.old
C. stpolicy.nsf<dateStamp>.old
D. vpuserinfo.nsf<timeStamp>.bak

Answer: D

QUESTION: 78
Chris has configured usage limits in meetings for his company Sametime server. When a limit is reached, which of the following occurs?

A. People are denied from starting instant meetings or attending meetings
B. People receive a prompt that the server may possibly be overloaded, but they are allowed to enter the meeting
C. A warning is written to the log and a notification sent to the administrator for capacity planning. The meetings continue to run
D. Current meetings continue but future meetings will not go active and instant meetings will not begin until the limit is raised or no longer exceeded

Answer: A

QUESTION: 79
You are attending a scheduled meeting that you are participating in with audio and video. During the meeting you start a breakout session with Barbara from another department and were the last person to talk over IP in the main scheduled meeting. However, after starting the breakout session, Barbara is unable to see your video. Which of following best describes why she is unable to see your video?

A. Video is not allowed in breakout sessions, so Barbara would not be able to see you.
B. The breakout session must be performed on a different server than the scheduled meeting.
C. Whiteboard and screen-sharing control in the scheduled meeting must be given to someone else before you enter a breakout session
D. As the last person to talk in the scheduled meeting, your microphone must be muted and someone else must speak in the scheduled meeting to switch to their video and release yours to be shown in the breakout session.

Answer: D

QUESTION: 80
Which one of the following protocols is used by the Sametime Broadcast Services?

A. Instant Transport Protocol (ITP) and Instant Transport Streaming Protocol (ITSP)
B. Sametime Transport Protocol (STP) and Sametime Transport Streaming Protocol (STSP)
