What are two capabilities of Remote Management Agent (RMA) supported by the SurePOS 5x6 models?

A. screen takeover
B. problem diagnostics
C. security enforcement

D. software distribution

Explanation:
Toshiba Remote Management Agent provides proactive monitoring that can dramatically reduce service costs and downtime.
RMA provides the following capabilities:
* (B)Automatically identify and predict problems before they cause interruptions in the store and send notifications to a mobile device, email, or start a task to correct the problem without manual intervention
* (D)Software distribution, updating BIOS, firmware, drivers, OS security patches, and retail applications
*Remote enterprise management which provides visibility and monitoring of system software and hardware from a single console
*Inventory management, identifying where systems are deployed and tracking hardware and software versions
*Out of the box remote monitoring of the hardware and peripherals to help prevent hardware failures and outages
*Health Status Dashboard to easily see a comprehensive view of system health across the enterprise
*Power management to control when retail systems sleep, power on, power off, or restart
