## Version: 7.0

---

### Question: 1

---

Which of the following describes the WAS Liberty profile?

- A. It can be purchased at a lower price compared to WAS (base) and it appeals to developers because it is lightweight and can be re-started quickly for testing
- B. It provides a lightweight runtime for web and mobile applications
- C. It is only available as part of WAS Liberty Core
- D. It requires licensing only when applications go into production.
- E. It is an edition of WAS guaranteed to support existing open source applications without any code changes being needed.

---

**Answer: B**

---

---

### Question: 2

---

In which of these circumstances is implementing WebSphere Application Server on System z recommended?

- A. When the customer has extensive COBOL development skills available
- B. When the data used by applications running on WAS is located on System z
- C. When the application workload volume is predictable and uniform in priority
- D. When the security of the application workloads and data is not a major concern
- E. All of the above

---

**Answer: C**

---

---

### Question: 3

---

Which of the following is a reason why customers want WebSphere Application Server?

- A. To provide high performance for Java applications at the lowest possible cost with Version 8.5 or later releases of either WAS ND or WAS for z
- B. To support developers who want to take advantage of the latest Java programming models without any cost for unit testing on their desktops
- C. To quickly enable web based applications for mobile devices
- D. To deliver SOA-enabled applications that leverage service reuse
- E. All of the above

---

**Answer: A**

---

Explanation:
