Answer: C, D

QUESTION: 69

Which data bound object type would not need a label object to display a description of the data in the field?

- A. Text box
- B. Check box
- C. Combo box
- D. All data bound objects would need a label object inserted

Answer: B

QUESTION: 70

Which of the following statements is true about a field TabIndex?

- A. If you want the cursor to skip over a field when using the Tab key to move around the screen you should set the TabIndex to 0 or 99.
- B. When in Customize Mode you can display the TabIndex values for all the fields on the screen at the same time.
- C. When you move fields around, Solomon automatically adjust the TabIndex so that the movement through the screen matches the physical layout.
- D. The TabIndex property values determine how users move through the screen using the TAB key, not the physical placement of the controls on the screen.

Answer: D
