In this scenario, which outbound TCP port would you enable to access the LUN?

A. 445
B. 3260
C. 2049
D. 111

Answer: C

Question: 5

You want to move cold user data blocks from an AFF A300 active file system to the capacity tier In AWS S3. In this scenario, how would you configure FabricPool?

A. Set the auto tiering policy.
B. Set a Snapshot copy tiering policy.
C. Set the backup tiering policy.
D. Set a none tiering policy.

Answer: D

Question: 6

You are the administrator of a company that has purchased a new NetApp HCI cluster. To ensure granular control over each VM's HDD performance, you decide to use only vVols in your VMware vSphere environment. Your company also has a FAS system that is serving CIFS and an E-Series serving LUNs over InfiniBand. You are asked to back up all VMS to an offsite location.
What is a supported method to back up all of your VMs?

A. Replicate the vVOLs using SnapMirror to the existing FAS using SnapContro
B. Replicate the vVOLs using SnapMirror to the existing E-Series using SnapCenter.
C. Use third-party backup software to make a VADP backup of the VMs-
D. Create a Snapshot policy for the datastores in SolidFire Cluster Administrator.

Answer: D

Question: 7

You are managing vow Cloud Volumes ONIAP Instance running ONTAP 9.3. You notice that your volumes are using too much space. Which command do you use to display the Snapshot copy disk consumption?

A. volume efficiency show
B. df -h
C. volume snapshot autodelete modify
D. volume show

Answer: A
