Information - Data - Knowledge - Wisdom Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined? A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management  Answer: A		
A. Process owner B. Change manager C. Service manager D. Process practitioner  Answer: D  Question: 2  Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management D. Incident management Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	Question: 1	
A. Process owner B. Change manager C. Service manager D. Process practitioner  Answer: D  Question: 2  Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management D. Incident management D. Incident management O. Service level management D. Incident management D. Incident management D. Incident management D. Incident management  Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management? A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined? A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	M/h: -h	
B. Change manager C. Service manager D. Process practitioner    Answer: D	which role is responsible for carrying out the activities of a process?	
C. Service manager D. Process practitioner  Answer: D  Question: 2  Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management D. Incident management Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data - Knowledge - Wisdom D. Information - Data - Knowledge - Wisdom Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	A. Process owner	
C. Service manager D. Process practitioner  Answer: D  Question: 2  Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management D. Incident management Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data - Knowledge - Wisdom D. Information - Data - Knowledge - Wisdom Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	B. Change manager	
D. Process practitioner    Answer: D		
Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management D. Incident management Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Manswer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	•	
Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management D. Incident management Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Manswer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management  Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		Answer: D
Which process or function is responsible for monitoring activities and events in the IT infrastructure?  A. Service level management B. IT operations management C. Capacity management D. Incident management  Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	Ouestion: 2	
A. Service level management B. IT operations management C. Capacity management D. Incident management  Manswer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
B. IT operations management C. Capacity management D. Incident management  Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	Which process or function is responsible for monitoring activities and ev	rents in the IT infrastructure?
B. IT operations management C. Capacity management D. Incident management  Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	A. Service level management	
C. Capacity management D. Incident management D. Incident management  Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
D. Incident management  Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	•	
Answer: B  Question: 3  Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	. , .	
Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		Answer: B
Which of the following options is a hierarchy that is used in knowledge management?  A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
A. Wisdom - Information - Data - Knowledge B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	Question: 3	
B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	Which of the following options is a hierarchy that is used in knowledge r	nanagement?
B. Data - Information - Knowledge - Wisdom C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	A. Wisdom - Information - Data - Knowledge	
C. Knowledge - Wisdom - Information - Data D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
D. Information - Data - Knowledge - Wisdom  Answer: B  Question: 4  At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	-	
At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	D. Information - Data - Kilowiedge - Wisdom	
At which stage of the service lifecycle should the processes necessary to operate a new service be defined?  A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		Answer: B
A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	Question: 4	
A. Service design: Design the processes B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		
B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management		to operate a new service be
B. Service strategy: Develop the offerings C. Service transition: Plan and prepare for deployment D. Service operation: IT operations management	A Service design: Design the processes	
C. Service transition: Plan and prepare for deployment  D. Service operation: IT operations management		
D. Service operation: IT operations management		
Answer: A	, , , , , , , , , , , , , , , , , , , ,	
		Answer: A

Answer: D

Question: 5	
Why are public frameworks, such as 1TIL, attractive when compared to	proprietary knowledge?
A. Proprietary knowledge may be difficult to adopt, replicate o undocumented	r transfer since it is often
B. Public frameworks are always cheaper to adopt	
C. Public frameworks are prescriptive and tell you exactly what to do	
D. Proprietary knowledge has been tested in a wide range of environme	ents
	Answer: A
Question: 6	
Which of the following is an objective of business relationship managen	nent?
A. To identify patterns of business activity	
B. To ensure high levels of customer satisfaction	
C. To secure funding to manage the provision of services	
D. To ensure strategic plans for IT services exist	
	Answer: B
Question: 7	
The design of IT services requires the effective and efficient use of "the	four Ps". What are these four
Ps?	
A. People, process, partners, performance	
B. Performance, process, products, plans	
C. People, process, products, partners	
D. People, products, plans, partners	
	Answer: C
Question: 8	
Which of the following BEST describes service strategies value to the bu	siness?
A. Allows higher volumes of successful change	
B. Reduction in unplanned costs through optimized handling of service of	outages
C. Reduction in the duration and frequency of service outages	-
D. Enabling the service provider to have a clear understanding of what their customers successful	at levels of service will make

Question: 9	
Which two processes will contribute MOST to enabling effective problem	detection?
A. Incident and financial management	
B. Change and release and deployment management	
C. Incident and event management	
D. Knowledge and service level management	
	Answer: C
Question: 10
