Version: 9.0

Question: 1

You are creating a report that lists all open Personal Injury cases for an Auto Claim case. What three options do you use to configure the join for this report? (Choose three.)

- A. Specify the join type to include all rows in the Personal Injury class
- B. Specify a join for the Auto Claim class
- C. Specify a join for the Personal Injury class
- D. Specify the join type to only include matching rows
- E. Create the report in the Work- class
- F. Create the report in the Auto Claims class

Answer: C,D,F

Question: 2

What two actions must you perform to create a class join in a report definition? (Choose two.)

- A. Select the type of match for key values
- B. Add an association rule to match key values
- C. Create a prefix for the joined class
- D. Add a parameter for each property in the class you want to join

Answer: C,D

Question: 3

An agent runs every 300 seconds. You have been asked to update the agent so that it runs every Friday at 12:00 A.M.

How do you modify the agent schedule to meet this requirement?

- A. Change the Periodic pattern to Recurring. Open the Parameters dialog and update the schedule
- B. Keep the Periodic pattern. In the Parameters dialog, update the schedule
- C. Change the Recurring pattern to Periodic and enter the Interval value
- D. Keep the Recurring pattern and update the Interval value

Answer: C

Question: 4

You are troubleshooting a performance issue with a user interaction that exceeds the maximum time

of five seconds. The elapsed time shown in the performance report indicates a total of two seconds. Which tool do you use to determine what is adding the additional three seconds to the performance measure?

- A. Performance Profiler
- B. Database Trace
- C. System Management Application
- D. Log Analyzer

Answer: A

Question: 5

In which two situations do you use the PegaRULES Log Analyzer to analyze application performance? (Choose two.)

- A. After the application is deployed to a production system
- B. Before migrating an application to a testing system
- C. During User Acceptance Testing
- D. Throughout the application development life cycle

Answer: A,D

Question: 6

A given user interaction takes five seconds. You need to investigate why it is taking so long. Which tool do you use to start the investigation?

- A. Performance Analyzer (PAL)
- B. Performance Profiler
- C. Database Trace
- D. Pega Log Analyzer (PLA)

Answer: A

Question: 7

You are configuring duplicate case search logic in a case type. How do you ensure that resolved cases are not evaluated as potential duplicates?

- A. Add a weighted condition where the work status of potential duplicates does not contain "Resolved"
- B. Add a weighted condition where the work status of the current case does not contain "Resolved"
- C. Add a must match condition where the work status of potential duplicates does not contain "Resolved"
- D. Add a must match condition where the work status of the current case does not contain

“Resolved”

Answer: A

Question: 8

DRAG DROP

Select each Application Design Requirement on the left and drag it to the appropriate Design Approach on the right.

<u>Application Design Requirement</u>	Answer Area <u>Application Design Requirement</u>	<u>Design Approach</u>
Display only relevant fields for a given task.		Assignment Instruction
Help the user perform an expected task		Intent-driven UI
Record the justification for an action taken on a case.		Assignment notification
Alert the user of a pending assignment.		Audit note

Answer:

<u>Application Design Requirement</u>	Answer Area <u>Application Design Requirement</u>	<u>Design Approach</u>
Display only relevant fields for a given task.	Help the user perform an expected task	Assignment Instruction
Help the user perform an expected task	Display only relevant fields for a given task.	Intent-driven UI
Record the justification for an action taken on a case.	Alert the user of a pending assignment.	Assignment notification
Alert the user of a pending assignment.	Record the justification for an action taken on a case.	Audit note

Question: 9

In the first step in a case type, the user compares data on a form to the data on a customer account. If the data matches, the case is resolved. If the data does not match, the user advances the case to update the account.

Management only wants a record of the cases that update an account. What two configuration options do you use to implement this requirement? (Choose two.)

- A. Apply a when condition to the first step to persist only cases requiring updates
- B. Configure the first step to instantiate the case type as a temporary case
- C. Configure the starting flow to instantiate the case type as a temporary case
- D. Add a Persist Case shape after the first step

Answer: A,B

Question: 10

You have a requirement to associate users in different units to the same workbasket. How do you implement this requirement?

- A. Associate the users to a common work group. Then associate the work group to the appropriate units
- B. Associate the users to a common work group. Then associate a workbasket to the work group
- C. Associate the users to a common unit. Then associate a workbasket to the common unit
- D. Associate the users to a common workbasket. Then associate the workbasket to the appropriate units

Answer: D

Question: 11

Business users are not able to update a delegated business rule. Select two possible causes. (Choose two.)

- A. The business users do not have appropriate privileges in the access group
- B. The availability of the delegated business rule is set to Blocked
- C. The delegated business rule is currently being executed by another user
- D. The delegated business rule is not in an unlocked production ruleset

Answer: A,D

Question: 12

You are configuring a screen flow as shown below:

Steps three through five must be completed in order. How do you configure the screen flow to meet this requirement?

- A. Select the Enable navigation link and Only allow navigating back to this step options for both steps four and five
- B. Select the Enable navigation link option for both steps, and the Only allow navigating back to this step option for step four
- C. Select the Enable navigation link option for both steps, and the Only allow navigating back to this step option for step five
- D. Select the Enable navigation link option for step four, and the Only allow navigating back to this step option for step five

Answer: D

Question: 13

A travel authorization requires approvals from the requestor's manager, division VP, and possibly an accountant based on the total amount.

Which configuration satisfies this requirement?

- A. Cascading approval using the reporting manager
- B. Cascading approval using an authority matrix
- C. Cascading approval using when rules to identify the assigned user
- D. Cascading approval using the workgroup manager

Answer: B

Question: 14

An organization uses a common process in the framework layer to address account inquiries from customers. Each implementation layer application includes a customized workbasket for processing account inquiries.

Select the configuration that standardizes the process while ensuring that users of each implementation only see assignments in the appropriate workbasket.

- A. Pass the workbasket name as a property reference using values on a data page
- B. Use a load-balanced router to route assignments to the appropriate workbasket
- C. Circumstance the flow based on the implementation to route assignments
- D. Use a skill-based router to route assignments to the appropriate workbasket

Answer: D

Question: 15

An application includes the following set of circumstanced instances of a decision table.

Class	Ruleset	Version	Circumstance
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-01	None
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-05	.Status="Silver"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-05	.Status="Gold"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-15	.Status="Platinum"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-15	.Status="Silver"

You update the application and increment the AccountManage ruleset version to 01-02-01. As part of this update, the circumstance .Status="Silver" is no longer needed by the application. How do you implement this change?

- A. Create a new version of the circumstanced decision table in AccountManage:01-02-01 and set the availability to Blocked
- B. Create a new version of the circumstanced decision table in AccountManage:01-02-01 and select the Base rule option
- C. Do nothing. Rule resolution does not consider rules in a lower minor version of a ruleset
- D. Create a new version of the circumstanced decision table in AccountManage:01-02-01 and set the availability Withdrawn

Answer: C
