Question: 1

What determines how a Symantec Data Center Security: Server Advanced agent performs protection?

- A. zero-day protection standards
- B. business critical mission controls
- C. prevention and detection policies
- D. industry and governmental regulations

Answer: C

Question: 2

How does Symantec Data Center Security: Server Advanced limit the potential for exploitation of enterprise resources?

- A. by ensuring all patches are implemented
- B. by detecting and repairing known malware
- C. by implementing least privilege access controls
- D. by recognizing aggressive software and user behavior

Answer: C

Question: 3

Which feature can be configured using a detection policy?

- A. Closing network back doors by defining ports to be monitored
- B. De-escalation of Administrator Privileges
- C. Real-Time File Integrity Monitoring
- D. Restricting Access to Externally Connected Devices

Answer: C

Question: 4

Which two statements accurately describe an advantage of using Symantec Data Center Security: Server Advanced prevention policies over traditional malware protection products? (Select two.)

- A. Symantec Data Center Security: Server Advanced prevention policies are proactive in protecting against Malware.
- B. Symantec Data Center Security: Server Advanced prevention policies require infrequent signature updates.
- C. Symantec Data Center Security: Server Advanced prevention policies can be applied to a machine

without installing agent software on the host machine.

D. Symantec Data Center Security: Server Advanced prevention policies protect a system by controlling the behavior of all processes running on that system.

E. Symantec Data Center Security: Server Advanced prevention policies are platform agnostic.

Answer: A, D

Question: 5

Which action applies to prevention policies rather than detection policies?

- A. they detect changes to files using Real-Time File Integrity Monitoring
- B. they audit changes to registry keys, files and folders
- C. they monitor for local events that trigger actions when matched
- D. they sandbox processes proactively when executed

Answer: D

Question: 6

Which feature can be configured using a detection policy?

- A. Closing network back doors by defining ports to be monitored
- B. De-escalation of Administrator Privileges
- C. Real-Time File Integrity Monitoring
- D. Restricting Access to Externally Connected Devices

Answer: C
