## Question: 1

---

Refer to the exhibit.

The screenshot shows the Backup Exec settings window. On the left is a navigation pane with 'Settings' at the top, followed by 'Catalog' which is highlighted. Below 'Catalog' are various other settings categories. The main pane shows three checked options: 'Request all media in the sequence for catalog operations', 'Use storage-based catalogs', and 'Truncate catalogs after'. The 'Truncate catalogs after' option is highlighted with a red box and has a dropdown menu set to '2 months'. Below this is a 'Catalog path' field with the value 'C:\Program Files\Veritas\Backup Exec\Catalogs' and a 'Browse' button. At the bottom of the window are 'Help', 'OK', and 'Cancel' buttons. A blue information box at the bottom of the main pane contains a message about changing the catalog location and a link to a support article.

Backup Exec catalogs each backup job.

What is the effect if the catalogs are truncated in the Backup Exec server's settings?

- A. restores fail
- B. only backup set information is listed in the restore wizard
- C. no backup set information is listed in the restore wizard
