Version: 8.0

Question: 1

How does Veritas Storage Foundation for Windows benefit multi-vendor storage environments?

- A. It dynamically provisions LUNs from dissimilar storage arrays.
- B. It provides hardware-based snapshots across dissimilar arrays.
- C. It reduces complexity and utilization across dissimilar arrays.
- D. It allows online migration of data across dissimilar storage.

Answer: D

Question: 2

Which Veritas Storage Foundation for Windows feature helps reduce downtime?

- A. volume shred
- B. dynamic volume growth
- C. striped volumes
- D. mirror spanned volumes

Answer: B

Question: 3

To complete the installation of Symantec Backup Exec System Recovery 8.5, which three actions are available before reaching the Home Page the first time the program is started? (Select three.)

- A. license and activate the software using the license key
- B. run LiveUpdate to check for product updates
- C. configure the SMTP notification settings
- D. use EasySetup to create the first backup
- E. use ImportSettings to copy configuration from a different computer

Answer: A, B, D

Question: 4

When running a file and folder backup, files are excluded by default from which three folders? (Select three.)

- A. Program Files folder
- B. Temporary folder
- C. Windows folder

- D. Documents and Settings folder
- E. Desktop folder

Answer: A, B, C

Question: 5

What is the optimal way to migrate Hyper-V virtual machines to new storage locations without disruption?

- A. mirror the volumes hosting the virtual machines to the new storage locations and break the mirrors
- B. migrate the virtual machines to their new storage locations with the Storage Migration Wizard Hyper-V option
- C. drag the volumes containing the virtual machines to their new storage locations in the Veritas Enterprise Administrator
- D. create volumes on the new storage locations and copy data from the volumes hosting the virtual machines

Answer: B

Question: 6

Why should Veritas Storage Foundation for Windows be used in a thin provisioned environment?

- A. to create thinly provisioned volumes
- B. to reclaim freed space on thin storage
- C. to migrate from shared to thin storage
- D. to defragment thinly provisioned volumes

Answer: B

Question: 7

Which file extension is used for file and folder backup files?

- A. .FFB
- B. .FBF
- C. .V2i
- D. .iV2i

Answer: B

Question: 8

Which feature does a storage administrator use to identify the physical location of shared storage?

- A. campus-aware allocation
- B. site-aware allocation
- C. array-aware allocation
- D. disk-aware allocation

Answer: B

Question: 9

Which feature creates simultaneous, multiple, split-mirror copies of volumes?

- A. duplication
- B. mirroring
- C. RAID
- D. FlashSnap

Answer: D

Question: 10

What is a benefit of having a dynamic mirrored quorum resource when using the Windows Failover Cluster option?

- A. prevents splitbrain
- B. provides high level of redundancy
- C. improves quorum arbitration
- D. reduces reservation conflict

Answer: B

Question: 11

On which region of the disk does Storage Foundation keep configuration information that it uses to manage Storage Foundation virtual objects?

- A. the secondary region
- B. the primary region
- C. the public region
- D. the private region

Answer: A

Question: 12

Which two load balancing policies are supported with Dynamic Multi-Pathing (DMP)? (Select two.)

- A. Weighted Paths
- B. Fault Tolerance
- C. Dynamic Recovery
- D. Least Blocks
- E. Dynamic Path Recognition

Answer: A, D

Question: 13

Which two are valid options for mirroring a 500GB striped volume created with two 500GB disks? (Select two.)

- A. add 2 200GB disks to the disk group where the volume resides, select mirror, then select auto select disks
- B. add 1 500GB disk to the disk group where the volume resides, select mirror, then select auto select disks
- C. add 3 150GB disks to the disk group where the volume resides, select mirror, then select auto select disks
- D. add 2 250GB disks to the disk group where the volume resides, select mirror, then select auto select disks
- E. add the unallocated space left from each disk in the disk group where the volume resides and mirror the volume

Answer: B, D

Question: 14

Which feature allows end users to quickly retrieve their own documents from recovery points using a Web interface?

- A. Recovery Point Browser
- B. Granular Restore Option (GRO)
- C. Backup Exec Retrieve
- D. Backup Exec Restore

Answer: C

Question: 15

Which two options are correct for expanding a 1GB striped volume with two columns to a 2GB volume? (Select two.)

- A. Add 4 256MB disks to the disk group and expand the volume using the max-size option
- B. Add 4 512MB disks to the disk group and expand the volume using the max-size option

- C. Add 2 512MB disks to the disk group and expand the volume using the max-size option
- D. Add 2 1GB disks to the disk group and expand the volume using the max-size option
- E. Add 1 1GB disk to the disk group and expand the volume using the max-size option

Answer: A, C
